Thread: Simple Text Based Sig Tut

Fisted - *January 31, 2011, 3:52 am*
Hey. Recently I have been completing a lot of requests for people in the request section and I decided to share my main method for making the sigs/banners that I produce.

Take note, these are simple text based sigs which should be achievable for anyone to achieve a cool loking graphic.

Check the end of the tut for some examples of this effect in use.
