Found these 2 amazing websites, thought I'd share.
http://bypassthisfor.me

http://proxiesfor.me

Proxiesfor.me offers 100's of working proxies, and they update them daily.
Best of all you can view them RAW + Country Based.http://proxiesfor.me/raw/

Bypassthisfor.me is a simple proxy, and it can be viewed on 95% of all office + school computers that block certain website(s). Use it to get around to your favorite porn website! Haha...

Tested and worked at my high school.

Your link doesn't work, however the websites I provided our on bulletproof hosting, and they can't be taken down.

Very useful on coding because of downloading new raw proxies is very hard.
Thank you mate.
