I couldn't leave the Hospital early and therefor I was stuck without me doing anything. I just got back and I have upgraded everyone to the latest new Switzerland Server, Improved CPU and Disk Performance 100% after an issue with the last one.
Here is what the Disk Read is at right now while all the VPS are on and running.

Very sorry for the massive load and downtime we had over 1 week, if i could i would of finished it that same day but couldn't.

Hallo,

I'm looking for a new host, and this look very promising :)
I've got one question left, that's not very clear after reading the first 8 pages.
Is it allowed to host a http botnet on this? Or is that only allowed on you bulletproof (NL) hosts?

Thanks in advance :)

VENETX - *September 23, 2013, 11:24 pm*
Only in the NL Hosts we allow this ; vshieldhost.com/cart.php?gid=4

And some good .htaccess rules to block the reportes ; http://pastebin.com/X5WdDai4

Thanks, and I've got another question.
Why can I only choose 1 month at the special offers?
Will the price go up after the one month?

VENETX - *September 24, 2013, 8:39 pm*
@jorinator
all prices stay the same unless noted other wise by a e-mail or ticket being open.

So to your question ; the pricing for the KVM 1,2,3,4 and Special Offers will always stay the same pricing. it will not affect if order monthly.

venetx ticket
Quote:We have an anti-ddos, anti-spam, script set in place for first time users. IT was triggered by an incoming ddos, your vps should be back to normal.
well how is that protection then if a simple ddos toward server knocks it ofline

VENETX - *November 30, 2014, 2:41 pm*
@dn5050

We detect who deserves the right to be whitelisted after 1week of observation.
Most of the orders we get are from 12 year old immature little kids who think its funny to DDoS xbox players offline, or its funny to spam their teachers e-mails.
This script has probably caught more perpetrators than we could do so ourselves.
