Thread: Computer laggy

PICwarrior381 - *June 10, 2017, 4:34 am*

Hello,

My computer is starting to lagg a lot latelly I think maybe I have something bad on my pc

Can you guys help me please?

(I've tried NoBot, removed me couple of things and Malwarebytes didn't find anything)

Please download Farbar Recovery Scan Tool and save it to your Desktop.

Note: You need to run the version compatible with your system. If you are not sure which version applies to your system download both of them and try to run them. Only one of them will run on your system, that will be the right version.
Right click to run as administrator. When the tool opens click Yes to disclaimer.

Press Scan button.

It will produce logs called FRST.txt and Addition.txt in the same directory the tool is run from.

Please copy and paste the logs back here.

1. Do you recognize these? They start at startup:

F - "F:\AutoPlay.exe" -c
G - "G:\SETUP.EXE"
"F:\Setup.exe"

2. Do you recognize this?

C:\Users\Ilmi\AppData\Local\Konduit\Konduit.exe

3. You have a proxy set, is this intentional or unwanted?

4. Please uninstall this using your control panel:

"Host App Service"

5. It is likely that your computers bloatware is cauing slowness, these:

HP 3D DriveGuard
HP CoolSense
HP Customer Participation Program 14.0
HP Documentation
HP Imaging Device Functions 14.0
HP Photosmart Plus B209a-m All-In-One Driver Software 13.0 Rel .6
HP Photosmart Plus B209a-m All-in-One Driver Software 14.0 Rel. 6
HP Registration Service

HP SimplePass
HP Smart Web Printing 4.5
HP Solution Center 14.0
HP Support Solutions Framework
HP System Event Utility
HP Update
HP Utility Center
HP Wireless Button Driver

If you don't want them or need them, you can uninstall them, just be sure to not uninstall any driver.

1: Yes I do but how are they in the startup?

2: Yes I do it's safe

3: Well, It's unwanted didn't know about that

4: Done

5: I uninstalled some of them but I don't know if I need to uninstall all.

I don't know how they actually start, all I know is they do.

Download fixlist.txt file and save it to the Desktop.

NOTE: It's important that both files, FRST/FRST64 and fixlist.txt are in the same location or the fix will not work.

NOTICE: This script was written specifically for this user, for use on that particular machine. Running this on another machine may cause damage to your operating system

Run FRST/FRST64 and press the Fix button just once and wait.
If for some reason the tool needs a restart, please make sure you let the system restart normally. After that let the tool complete its run.
When finished FRST will generate a log on the Desktop (Fixlog.txt). Please post it to your reply.

Please download Junkware Removal Tool to your desktop.Run the tool by double-clicking it. If you are using Windows Vista, 7, or 8; instead of double-clicking, right-mouse click JRT.exe and select "Run as Administrator".

The tool will open and start scanning your system.

Please be patient as this can take a while to complete depending on your system's specifications.

On completion, a log (JRT.txt) is saved to your desktop and will automatically open.

Post the contents of JRT.txt into your next message.

PICwarrior381 - *June 11, 2017, 4:18 am*
JRT.txt: https://pastebin.com/Xc3YrK79

Fixlog.txt: https://pastebin.com/eh7GRmZU

Is your computer still laggy?

Please download RogueKiller and save it to your desktop.Quit all running programs.

Right-click on the program and select Run as Administrator to start and when prompted allow it to run.

Read and accept the EULA (End User License Agreement)

Click Scan to scan the system.

When the scan completes select "Report", a log will open. Close the program > Don't Fix anything!

Post the contents of the log in your next reply.

Please uninstall Free Studio by DVDVideoSoft using your control panel, this program comes bundled with adware.

Download fixlist.txt file and save it to the Desktop.

NOTE: It's important that both files, FRST/FRST64 and fixlist.txt are in the same location or the fix will not work.
