Although I am not Uber/Leet I just want to thank you for giving back! I know about DoS, but can you stay annonymous when DoSing? The charges for DoSing are heafty and I am skeptical about using a DoS. I'm still new to the computer world and I have only got my foot wet. Also, can you name some situations or uses for the DoS? Thank you in advanced!

Good job on grave digging.
I no longer offer this shell.
