This simple program allow you to CONVERT (NOT download) your Links of $harecash!
With this in fact you can convert from mirror (like [spam]) into original (sharecash.org) and from original (sharecash.org) into mirror (you can choose design and mirror!)

This Software use ONLY Webrequests! This mean ULTRA SPEED! In fact, the difference between Webbrowser and Webrequest is that the Webbrowser is more slow than Webrequest!

mm lol, i haven't seen it before... well, i don't know the difference, probably the only difference is that you can choose the design of the mirror in this software (mmm pretty useless:))

EDIT: Probably The difference is that you CAN Download my software.
