Thread: [\[TUT\] - HOW TO KEEP FUD FOR EVER - \[TUT\]](#)

nickjonnes - January 27, 2011, 7:34 pm

Hey guys,
many people get really angry because they are losing victims and they say:"oh i crypted only three weeks ago."
well truth is that's about how long it will stay fud for but..
now you can add this code in to make it so that you can update your trojan with a new encryption.
this updater will not only update. it will detect and see if a new version of your trojan is available
making it easy and less buggier than some other methods that i have come across.
Dont Believe me?
see for your self:
