hey what is a good program for the job that works would appriceate it thanks in advance i love u guys?

Lucky Jimmy - *April 23, 2012, 5:20 pm*
Well... Long answer short, you can't just do that. If you got someone's username and no idea what the password is, it would take YEARS to just plain old brute force it.

????A?? - *April 23, 2012, 5:26 pm*
Brute force wouldn't work with facebook anyhow, facebook will lock up after so many incorrect logins. So bruteforce wouldn't actually work, if you just want a facebook password I suggest you keylog/rat the person

couldnt i just revert it through the recovery thing cuz i want to lock her out of her account for hate speech

slamsedagwood - *April 24, 2012, 9:25 am*
ratting is the best and probably only way you can use
