Thread: [\[VB.Net\] Anti-Fiddler src](#)

[ZERO] - January 29, 2011, 9:15 pm

Haven't seen this one here, so i thought it could be useful to some of you guys.

Code Try

```
Dim x() As Process
x = Process.GetProcesses
For Each p As Process In x
    If p.MainWindowTitle.Contains("Fiddler") Then
        p.Kill()
    End If
Next
Catch
End Try
```

Yeah, i know that the code is simple, but it does the job. ?

guard - January 29, 2011, 9:17 pm

EDIT: Ah, I gave the snippet a go, their are still many bypass issues, but nonetheless good job. ?

[ZERO] - January 29, 2011, 9:18 pm

It monitors for Window Title, not exe name. :)

MoonWalker - January 29, 2011, 9:21 pm

simple code, Good job.

Thanks for sharing

Tate - January 29, 2011, 9:23 pm

This would be incredibly easy to bypass simply by changing fiddlers window title with a quick program in c++, but this is still better than nothing.

kobac - January 29, 2011, 10:10 pm

Anti of the Anti :)

```
Code <DllImport("user32.dll")> _
Private Shared Function SetWindowText(ByVal hWnd As IntPtr, ByVal text As String) As Integer
End Function
```

'call

```
Sub renF()
For Each p As Process In Process.GetProcesses
    If p.MainWindowTitle.Contains("Fiddler") Then
        SetWindowText(p.MainWindowHandle, "lawl")
    End If
Next
End Sub
```

For Each p As Process In Process.GetProcesses
If p.MainWindowTitle.Contains("Fiddler") Then
SetWindowText(p.MainWindowHandle, "lawl")
End If
Next
End Sub
Hah, i knew you're going to do this <3 :D
```

Joler1302 - January 30, 2011, 4:40 am

I suggest you use a system like AV's, signatures :) Just find something in the program hex dump that if you take it away=program not working so that it cant bypassed :)

SIM-3598603 - October 16, 2017, 6:13 am

Thanks can use it still very good!

There is no need to thank a banned member for a thread that was posted 6 years ago.

Once Change Main Windows Title Do not kill him

666th - November 7, 2017, 4:15 pm

Thank you my dude, i was looking for a way to kill debuggers ect

Mr. Kim - November 7, 2017, 8:34 pm

Jesus Christ, stop grave digging a 7 year old thread.

Can we get a close for this please?
