Thread: Strangest MySQL Dump Hash

?Racer C'mon! - *January 6, 2015, 9:01 pm*

So I just got this hash from a Microsoft IIS server (Microsoft Database or something) so it is very strange.
Username is "Linpro"

And the hash is:
Quote:
PlspnrotoscrrvlrvvrlpytnitktcrztetovcrltymmstsvpsntltvrpostuvcrtusvlvscttnrtvutpltprprtrwprcretkvrtpnsttvrtrstshlstjcroptvrstkutoloptrctssvottsositvvppllercvyscopultutykirretortstrlsstLrsomnsokocrtursnstyrysnnorpssvtvoCtritiuroprjcrltrprprsplRnjcleruvsrLr

Strange..

And all the passwords in the database are that same (that weird string of text).

Does anyone know? I really want these passwords.

Are they all the EXACT same string? Because that makes me thing this isnt the password column and is actually just gibberish or something else unrelated.

Forezza - *January 6, 2015, 10:44 pm*

Could just be shifted ascii values. Are all the passwords the same length? ASCII values:

Yep you're right that information is just in the "text" columns. And there is something weird also in the "titel" columns. Weirdly enough the username:password is just "jenle:jenle" , "Linpro:LinproHL" and "Koste:Koste".

The "Title" is kind of the same just different lenghts.

Here is the Dumps if you want to see:
