What does this do exactly?

Save the code as a batch and execute it on any of your victims to disable/delete some of the most common AVs found!

Extra Help:

If you don't know how to create a batch file, read here:

1. Open Notepad.
2. Insert the wanted code (in this case the one above)
3. Save as "anything.bat"
4. As simple as that! You now have a working batch file :)

P.S. Please reply back to the thread if you are going to use this :)
use this so people you i4i with get all your bots.

Sorry sir, I was not up at 8:16 in the morning, I actually just woke up 11:51. I don't even know what code you are talking about I changed the email to yours and sent you the code? Is that not what you needed? So don't tell me I am not legit...

The account is verified to your email why the fuck would it send a code to me?

And it was an issue with bs, 4.5.1 was fucked up so he made us go back to the older version and I lost a lot of installs and I didn't have the money to buy some to give them to you. And also you didn't tell me you wanted the account back I said I couldn't round up the money so I transferred it all back to you. And yes, I did speak to you regarding it.
