Thread: [PP/LR] BlackNix RootKit [19$] [FUD] [32/64 Bit] [98/XP/Vista/Windows 7/Windows 8]

elmedoc - *August 13, 2012, 7:14 am*

[img]http://icons.iconarchive.com/icons/tatice/cristal-intense/24/Information-icon.png[/img] INFO:

BlackNix RootKit, is a simple rootkit who can installs your malware, totally hidden from the registry,msconfig.
We don't use public shit.
We use private method, who work on all os Windows, 32 or 64 Bit.
The rootkit work with all malware or .exe. (rat,keylogger,botnet,form grabber,stealer,worm ect...)
The rootkit need at the moment .NET 2.0.
The rootkit is ring3 at the moment.

[img]http://icons.iconarchive.com/icons/visualpharm/finance/24/coins-icon.png[/img] HOW BUY ?

You can buy from Liberty Reserve or PayPal. (PayPal = ONLY BY GIFT)
Just send me PM with info:

Quote:You want to buy from PayPal or Liberty Reserve ?:
The link of your .exe:

hmm interesting are you willing to hand out any vouch copies ??? if so it would be great :)

Flaxpicker - *August 13, 2012, 7:32 am*

Looks like a great service... id buy this if it had no dependencies

.Infinity. - *August 13, 2012, 7:50 am*

Too expensive for a .net rootkit that doesn't bring anything new to the market.

Or just another rename of Darkfire Rootkit. Rootkit is not possible in .NET

I doubt this works on Windows 98.

elmedoc - *August 13, 2012, 8:07 am*

@BlackArray

I don't use DarkFire :)

I'm just using some tick unknow ^^

@All

Sale is closed, because i have selling the source for 200$ to HF User.
