Thread: Magazine poster

Cubez - *September 14, 2015, 4:00 am*

So for a business assigment I had to make a magazine and i spent most of my time on the cover (The rest looks shit because we didnt get marked on the design but anyway. Just want some feedback on this (Already handed in but I like what I have made) I made the logo aswell. ?

And yes I did interview julian wilson and jalessa vincent because they are both good friends of mine. If you dont know them then google them.

Looks pretty good except for the image beeing a bit of bad quality.

Looks good, expect the vertical line on the bottom.
I would prefer a wave icon instead of the "x".

You should look for another image to use or hire someone to take a few. Your current is low quality, pixelated and looks a little stretched

Thanks for the feedback guys, On the final one that I printed out the background image was very high quality, I dont know what happened to it here. Maybe because i reduced the size by 50%
