Thread: ? EXCHANGERS ? Biggest ADSENSE click exchange group - make thousands...we have ass

Boa Hancock - *December 25, 2012, 5:08 pm*

Greetings Hackforums,

Friendly warning before you read: Please ignore invitations from people apart from myself (Boa Hancock) and Nico Robin. There are fraudsters and conmen going around inviting you to their fake groups - the same people who are posting false screenshots and thrash in our read, let the vouches talk and see for yourself that we are a HQ group.

We are a Adsense click exchanging group with hundreds of members - it is a group full of people who know what they are doing to ensure your safety, before you join we will give you a guide which will cover everything you need to know!

We make alot of money per month with adsense and our ban rate is very low. In fact we are the BIGGEST click exchanging group for Adsense.

No further explanation needed, you want money, we want more members, lets make this work.

How to join? Respond to this topic with your name, age, your ad network and country

Hello people of hackforums, look at your adsense, now back at me, now back at your adsense, now back at me. Sadly, you aren't earnings as much as I do, but if you stopped trying to earn money being legit and join our group, you could earn as much as we do! Look down, back up, where are you? You are in a group - full of people earning money from adsense like crazy. Whats in your hand, back at me. I have it, its an oyster with two tickets to that thing you love. Look again, the tickets are now your adsense checks - they are over 9,00!! Anything is possible when you join us. I am on a fucking donkey.

no, its because we do not use MyLike as a source. Please sign up to an ad publishing network for example Adsense, 7Search, Media.net are all fine.
whats the difference ? All they have to do is click my link and ill click theres?

the point where you asked what's the difference made it very clear you do not know the difference between the two networks.

Amazing group everyone should apply

Nico Robin - *January 10, 2013, 7:19 pm*
Well, i am going place a fine line here to everyone who going apply.
You can either listen to their so called "warnings" or you submit an application with us.
Either way it will be fine with us.
This is your interest to join, not ours.
Everyone we recruited has no problems with our method of verification check & was told they will be undergoing a verification check VIA Team Viewer before they joined the group.
To all the applicants, choose yourself whether you want to join.

Joined this group yesterday, it is way better organized than other groups I've seen in a while. Owners know what they are doing and they assist members of the group to increase profit. I had no problem with the verification method or anything else. I can vouch for this group. It has a bunch of active users that are nice against each other. If you need an ex group I would highly suggest you to apply here.

your just pissing Boa & Me off
(Jan 10, 2013 08:19 PM)Nico Robin Wrote: *[CITE]* Well, i am going place a fine line here to everyone who going apply.
You can either listen to their so called "warnings" or you submit an application with us.
Either way it will be fine with us.
This is your interest to join, not ours.

Everyone we recruited has no problems with our method of verification check & was told they will be undergoing a verification check VIA Team Viewer before they joined the group.
To all the applicants, choose yourself whether you want to join.
If you think about it, its only those SAME people complaining, yeah the same ones that NEVER even applied, you don't see brand new recruits complaining, in fact they are vouching. so choose yourself, stop wasting my time.

Hello people of hackforums, look at your adsense, now back at me, now back at your adsense, now back at me. Sadly, you aren't earnings as much as I do, but if you stopped trying to earn money being legit and join our group, you could earn as much as we do! Look down, back up, where are you? You are in a group - full of people earning money from adsense like crazy. Whats in your hand, back at me. I have it, its an oyster with two tickets to that thing you love. Look again, the tickets are now your adsense checks - they are over 9,00!! Anything is possible when you join us. I am on a fucking donkey.

t0ks1ck™ - *January 13, 2013, 10:38 pm*

Yeah that's what i though, i understand it shouldn't be easy to get in and that's what makes the group safe. I have registered before in this forum i just can't remember which email i used, i have an account from 2012 and other account from 2010 when i first joined, if any of you could just have a few words with me in a chat you could see that i could be trusted. Ill be trying meanwhile to find my old account.

its alright to be noob everyone starts at that point sometime in their life
its pretty simple
the platform we use is like an instant messaging.
so we have a whole group with a varieties of countries for you to choose from, you can talk in group

chat and help each other out or seek advice, or private message someone in the group to exchange adclicks (to both profit).

I started without knowing a thing, it was my first time using Palringo and I even know the concept of exchanging. These guys helped me along the way. It's a great group and the profits are great.

With that said, applications are still open.

Did a little but of clicking for some people. Not for exchange. Just to get a perspective of what all this is. So i understand it now. I will do clicks without exchanges for now since my setup isnt done yet if i am accepted.help to do this would be awesome. I need to satisfy my technological needs and feed my dog!! Thanks again. :)

One mod/admin will just need to check your ip using any ip tracer websites to make sure people don't lie about their country. Well are you sure you can't change it at all? I know it's "hard" for cable isp's to get the ip changed. Did you ever try to leave your router/modem unplugged during the night to see if it would change?

i used to be in a click ring (that was hackforums based) a year or two ago, it was IRC based, not sure what happened to it... but yeah. i know my # of posts would probably prevent me from joining

your click ring, but i hope it won't. i'm no scammer or reporter. just looking to make some cash. right now i'm on bidvertiser because i'm testing out a technique to support my clicks with traffic to keep a low CTR, but once i get that stable + decent clinks (if i'm invited to join this click ring that is), then i'll move over to adsense.

hope to be clicking with you guys soon!

Did you try to reset the router, clone your router's macaddress (if possible not all models allow that). If nothing of that changes it try contacting your isp. They are usually friendly when you ask them about that ?

(Nov 22, 2013 06:18 PM)Gadafi Wrote: *[CITE]* So has any google employee's banned anyone on this group, even while doing it smart?
Yes. On this group, on the previous groups and in the future to come groups. We do not guarantee a 100% safe method. But follow some steps and you may "survive" a good sum of months and make a good money while on this ?

Fuck, seeing a thread like this brings back memories... mrGRINCH ran a adsense thread just like this and got as many replies as this...
Memories...

- Just a note of caution to everyone, don't overdo it. I had just as much as OP, however once I received payment from bittraffic (I think that's the name) their ad provider filtered my name, so essentially my clicks were worthless. Also adsense didn't send me any money even though I had $900 odd..

Is there an easy way to get an adsense account? I had one before but it was disabled due to

exchanging activity. I want to try again but I'm not sure whether they would approve my application because my bank account details are already linked to a disabled account. If there is a way, I'd be happy to join!

Hey guys, would be interested in getting back into this but I had a couple questions would anyone be willing to help?

- I used to be part of an adsense click group but once payday came they told me I was banned from using illegal methods (obviously the click exchange), but a few weeks ago I checked and I can still place ads, is it still possible for me to make money? If so, how many of you guys have actually received checks? As in made it to pay day without being caught? THanks guys1
