Thread: [Simple Text Based Sig Tut](#)

Fisted - January 31, 2011, 3:52 am

Hey. Recently I have been completing a lot of requests for people in the request section and I decided to share my main method for making the sigs/banners that I produce.

Take note, these are simple text based sigs which should be achievable for anyone to achieve a cool looking graphic.

Check the end of the tut for some examples of this effect in use.

Spoiler ([Click to View](#))

Now, time to sleep...

HysTERioN™ - February 28, 2011, 3:18 am

Very nice, simple and helpful, Thank you :D

erikmagic - February 28, 2011, 4:47 am

thanks awesome tutorial ..

But how do you open the layer styles I,m not able :S

thanks in advance erikmagic

Hackbo0k™ - February 28, 2011, 8:33 am

Very nice mate, good work

gua - February 28, 2011, 10:54 am

Basic tut and still looks good nice job ! 10 / 10

Ultimatum! - February 28, 2011, 5:55 pm

Actually a nice tut. Like it. Very simple and easy to follow.

+1 to you.

Elara - February 22, 2012, 8:41 am

Great tutorial just used this! It is way better and faster then my method.

Karma. - February 22, 2012, 2:10 pm

Very well written tutorial. I could tell you put effort in to this. +1 for you.

Staid - February 23, 2012, 12:21 am

Nice and simple tutorial, thank you.

thanks in advance erikmagicJust double click the layer were is no text then i should open up

hcakr - *February 26, 2012, 2:28 am*

wow very nice tut dude..vry simple to understant tanxx

iphoneboy - *March 8, 2012, 7:49 am*

Thanks for such a nice and detailed tutorial.

TheNeutron - *March 9, 2012, 1:59 am*

Cool tutorial dude. Nice share! Thanks xD

Yellow Sponge - *March 9, 2012, 7:19 pm*

Thanks for this tutorial! I'll try this right now.
