Has anyone else had this issue? It seems to be random. Last night it was long. (My friend also has the same issue)

Happens at times. Happens to everyone. Wait a bit, refresh. Repeat.

That happens often. Its annoying but nothing we can do about it.

Ah well I thought I was causing it for some reason lmao (I'm not)

It happens to everyone once in a while, it is also happening to me right now.

Wait it out.

Well ya that's what I do, But I was just curious on to why it was happening.

It's been happening to me a lot recently, it never used to do that. I don't know why it is now. It really aggravates me in any case. Also I get some 504 or 503 (I can't remember) messages on top of frequent SQL database problems.

I think it's done now... I hope... ?

Let's hope it's done. It's a pain, but it just happens.

Yes, I have frequent errors.
Was thinking of making a thread about this issue.
