Thread: The Flood *Spreading Methods* Amazing Methods!

La Ferrari - *March 13, 2013, 7:16 pm*

Programming & art combined in a way never seen before!

The Flood : Spreading Methods
-RAT's
-Keyloggers
-Almost any kind of stub

Requirements:
-Basic Knowledge
-YouTube Account
-Visual Basic or Studio 2008 and up. (optional)
-File Sharing Site Account
-Determination

Method 1: YouTube Spreading
1. The things you will need in this method are a YouTube Account and a File Sharing Account.
2. Basically what you are going to be doing is record yourself using a program, attracting the user to download and execute the program.(The program will be binded with your stub)
3. So you will obviously need DarkComet or some other programs involving stubs. Bind your stub with the program that you are "advertising" or using in the video that you made with YouTube.
4. When your file is uploaded, you can post the link in the description and simply label it "Download Link" like this:
5. Make sure the site that you upload your file on doesnt have any surveys, this will turn off people from downloading your binded file.

Method 2 : VB Project + YouTube Spreading
1. The things you will need for this method are Visual Basic or Studio, a YouTube Account, and a File Sharing site.
2. This method is basically making a simple program(doesnt have to be simple) and binding it with your stub.
3. Things you could make are... a pinger with 1000's of packets(to lag people) a game launcher, an alarm clock, a website pinger(to snatch website ip's) and much more.(the booter/pinger will be very popular)
4. You are going to want to make a video of you using your program, then uploading to YouTube. You will bind your stub with the made program and upload it to a File Sharing Site.
5. Some methods to spread your video and your download link are posting on pastebin, go on YouLikeHits and you can get your video many likes and views. Also, you can get subscribers. Last, you can post your programs on forums, there are many people looking for these little tools. You can learn how to make these tools on YouTube and Google.

Method 3: E-Whoring
1. E-Whoring is when you act like a girl, and get someone to download your infected file. This is a great method if you want this specific type of slaves; weirdos and desperate people.
2. Some sites you can E-Whore on are... Omegle, ChatRoulette, any chat room site, and forums. Theses sites and web "places" are the most popular places to E-Whore, and the most promising.
3. If you are going to E-Whore, you are going to have to act cute. I know this sounds pretty queer but whatever it takes to get bots and slaves.Some ways to E-Whore are to say that you have a picture of you, have a video of you, and or a slideshow of you. To do this, you will probably need an extension spoofer which you can find on HackForums, the search bar is your friend ? . Also, you must be patient and very persuasive in the process.

I am very sorry about the colors and everything. It is difficult for me to see different fades of colors. There will be MORE methods soon! If you like these methods you should leave a comment to keep this thread alive ? . Good Luck Everyone!

Nice man thanks for posting this! i vouch for this guy

Terry A. Davis - *March 13, 2013, 7:32 pm*
Thanks for the guide, though I don't think it will work that well.

Coding™ - *March 13, 2013, 7:37 pm*
Vouch nice guide bud keep it up and i gotcha

xSploit™ - *March 13, 2013, 7:40 pm*
Very creative, never seen anythingggg like this before..-.-

La Ferrari - *March 13, 2013, 7:41 pm*
Thanks guys, Perfect Cell, these methods have worked GREAT for me. I've gotten a substantial amount of bots in the past. I know the thread doesnt make it any better either but this is my first tutorial thread where i actually spent some time on. ?

FLIP0NYMOUS - *March 14, 2013, 3:45 am*
Nice work Kringeify, This method is really easy and fast way to spread Virus. Respect !

Xirian - *March 14, 2013, 1:26 pm*
Nicely done thread. Keep updating, the more the better. ?

Guestguest - *March 14, 2013, 2:14 pm*
This is good but you need to explain this mush better for the beginners...

Th3PonyWizard - *March 14, 2013, 2:26 pm*
Nothing is amazing at them. Everything is plain obvious, unoriginal, anybody with a bit of sense can figure and do them without this thread.

(Mar 14, 2013 02:14 PM)Guestguest Wrote: *[CITE]* This is good but you need to explain this mush better for the beginners...Well find your own methods,I use a youtube spread method myself and got 2k downloads for a account phisher.

swinepr0 - *March 14, 2013, 2:31 pm*
those are pretty well known methods, but cool anyway

La Ferrari - *March 14, 2013, 7:48 pm*
Theponywizards, or whatever that name is...
Notice how this is in the beginners section. Gtfo, and yea, i do need to explain better for beginners. I will do that in the next update. I am just trying to help beginners and some of the community.

SHADOW REALM - *March 14, 2013, 7:55 pm*
And you aren't allowed to talk about Fake Programs so that vb.net one wont work

La Ferrari - *March 14, 2013, 7:59 pm*
i never said that the programs were fake. you can still code vb programs and actually have them to function + work.

Cgh0st.Pr0sV1ru5 - *March 15, 2013, 8:05 am*
It works freaking awesome! Respect bro!

Investigator' - *March 15, 2013, 1:38 pm*
Kringeify is a great member and this thread is a good, helpful contribution. I hope It'll help many beginners. Thank you for writing this! ?

Nephist - *March 15, 2013, 8:08 pm*
Good guide, thanks for sharing OP. :)

kirby193 - *November 26, 2013, 1:46 am*
I would think another good way to spread is give out YOUR file w/fake .dll error. Then 'fix' it by re sending it with some bullshit menu AND the dll that would make the file 'work'.

Notice how this is in the beginners section. Gtfo, and yea, i do need to explain better for beginners. I will do that in the next update. I am just trying to help beginners and some of the community.You're offending beginners, they're not retarded. This DOES NOT take any thought, I get brain damage just from wondering who DOESNT know this. You didn't explain how this is amazing by any mean.

Lango - *January 3, 2014, 7:12 am*
thanks for the guide,

found some of the things quite useful

Jannes - *March 10, 2014, 11:47 am*
Thank you very clear. Yes oh yes carl cox

viewsonic1970 - *April 6, 2014, 6:24 am*
Thanx for taking the time to explain and write this out, made the muddy water a bit clearer :)

Fajitas - *January 4, 2015, 1:45 am*
thank you very much, gonna test it today

Hacky09 - *January 14, 2016, 10:56 am*
Thank you for this nice tutorial test it today

alejandro752ska - *May 15, 2023, 11:17 pm*
well i will try E WHORE wish me luck HAHAHA

momotion - *May 16, 2023, 6:47 pm*
thank you for the guide!
