Thought some of you might get a chuckle or two out of this.. Not big on the defacing no more. Hense the non-defacement.

? I know. I think we all know by now.
This is why it took me all of 5 minutes
to do what I did. ?

You're quite literally testing the same variables over and over

page=78' works! good let's try page again

page=90' shit! i might be on to something

page=30' OH MY GOD!

I know it's just the scanner and it doesn't mean you're ACTUALLY trying the same variable multiple times. But seriously... the page isn't, at least from what you've posted, filled with holes. You're just catching the same unsanitized variables

uglykidjoes - February 1, 2011, 12:21 am

Woo where you find that dork scannet plz share
