Thread: [\[Update\]HackForums PM viewer \[Source\]\[VB.Net\]](#)

TLF-KoBE - February 1, 2011, 4:24 pm

UPDATE

I have released an updated application [here](#). Therefore I am releasing this source along with the new application to everyone. Enjoy it!

[Download the Source here](#)

This is a preview of a Hackforums PM application I started today. It's coded in VB.Net 2010 and uses WebRequests to post/retrieve data. Currently it grabs one page of PM's, I do not have enough PM's to see what it looks like when you have over a certain amount. So after this post hopefully I will be able to add that in as well.

Current features:

Grabs PMs

Displays PM

Launch PM in Browser

Launch Senders Profile in Browser

Update

Features added: (note: these are not included in the download or the source code, they will be included when I release an update)

☒Reply to PM's

☒Grab all pages

☒Compose PM's

☐Cache to view PM's offline

☒Option to stay logged in (save cookies)

☒Option to save login info

☐Multiple Folders

Edit: I lost a lot of files on my computer and this project was one of them. For anyone interested in doing something like this. PM me. I don't check PM's on here as often as I used to, so if you REALLY need to send me a message, <http://tech.reboot.pro> is the quickest way.

very nice download to check it

KingCobraXD - February 1, 2011, 4:39 pm

That is soooo cool! I love it! =)

.Astro - February 1, 2011, 4:41 pm

Damn, this is nice.

I was thinking about this project, but then decided that I should wait and learn more VB.

IIIBeBackSoon - February 1, 2011, 4:41 pm

Are you using a regex to get the info?

TLF-KoBE - February 1, 2011, 4:47 pm

(Feb 1, 2011 05:41 PM)Simran Wrote: [\[CITE\]](#) Are you using a regex to get the info?

No, I dont like RegEx, ive never really used it. String.Replace wasn't working to well either so I made a few subs to help parse out the info. I'll PM you the source if you'd like.. you release some good stuff.

@Ac?™,KingCobraXD : I'm glad you like it. Thanks for the feedback. Don't forget, PM if you want to check out the source.

Pulser - February 1, 2011, 4:51 pm

I feel like this would go hand in hand with my HackForums Friends list :)

IIIBeBackSoon - February 1, 2011, 4:52 pm

(Feb 1, 2011 05:47 PM)KoBE Wrote: [\[CITE\]](#) No, I dont like RegEx, ive never really used it. String.Replace wasn't working to well either so I made a few subs to help parse out the info. I'll PM you the source if you'd like.. you release some good stuff.

Sure why not, would love to see how this works!

Ultimatum! - February 1, 2011, 5:00 pm

What is it coded in? Could i please view the source? Downloading now too, i like it :)

TLF-KoBE - February 1, 2011, 5:09 pm

(Feb 1, 2011 05:51 PM)Mr. Predictable Wrote: [\[CITE\]](#) I feel like this would go hand in hand with my HackForums Friends list :)

I thought about that when I was making it. Could definitely combine them together.

(Feb 1, 2011 06:00 PM)Chromo Wrote: [\[CITE\]](#) What is it coded in? Could i please view the source? Downloading now too, i like it :)

VB.net, sorry forgot to mention.

KingCobraXD - February 1, 2011, 5:18 pm

(Feb 1, 2011 05:52 PM)Simran Wrote: [\[CITE\]](#) Sure why not, would love to see how this works! Lol, Simran. Source id only for l33t and ub3r..unless ur an exception. =)

TLF-KoBE - February 1, 2011, 10:00 pm

(Feb 1, 2011 06:18 PM)KingCobraXD Wrote: [\[CITE\]](#) Lol, Simran. Source id only for l33t and ub3r..unless ur an exception. =)

I put him in the "or highly contributing members" group.

Vysse - February 4, 2011, 1:17 am

I would like to have the source if that is ok with you...

ident - February 4, 2011, 1:35 am

I'd like to take a look also.

RiperFish - February 4, 2011, 2:16 am

I love that Idea budy, great work :).

h4yR0 - February 4, 2011, 4:59 am

very usefull tool , thanks :)

Ghostenigma - February 4, 2011, 6:11 am

Nice work man...I would like to have the source.Thanks in advance

The-One - February 4, 2011, 6:19 am

Try adding a pop-up thingy that appears when a new message comes in, overall, nice idea.

TLF-KoBE - February 4, 2011, 8:23 am

(Feb 4, 2011 07:19 AM)The-One Wrote: [\[CITE\]](#) Try adding a pop-up thingy that appears when a new message comes in, overall, nice idea.

Yea.. i thought about it. I might try to implement something.

Everyone who requested the source should have got a PM, if not PM me and ill send it.

@ident i sent you the source even though you rarely say anything constructive, if you are going to bash something I'd appreciate it if you give an alternate method or not say anything at all. thanks.

Clouds - February 4, 2011, 10:53 am

I don't suppose I would qualify for the source, would I?

Shu7down - February 4, 2011, 10:59 am

Great app. mate :) I would want to get the source code from this app. :) Thanks in advance

TLF-KoBE - February 4, 2011, 12:37 pm

(Feb 4, 2011 11:53 AM)RainDrops Wrote: [\[CITE\]](#) I don't suppose I would qualify for the source, would I?

Not yet, I've almost finished the Advanced Version, when I do.. I will release this source to every one.

(Feb 4, 2011 11:59 AM)Shu7down Wrote: [\[CITE\]](#) Great app. mate :) I would want to get the source code from this app. :) Thanks in advance

Pm sent.

Clouds - February 4, 2011, 3:39 pm

(Feb 4, 2011 01:37 PM)KoBE Wrote: [\[CITE\]](#) Not yet, I've almost finished the Advanced Version, when I do.. I will release this source to every one.

Alright, thank you for letting me know. ^^

Variola major - February 4, 2011, 6:50 pm

Nice man Liking you puting time for coding into hf !

TLF-KoBE - February 5, 2011, 12:56 pm

(Feb 4, 2011 07:50 PM)Variola major Wrote: [\[CITE\]](#) Nice man Liking you puting time for coding into hf !

Thanks for the comment.. V2 is almost done, just need to add a few more features. Once it's done.. I will release this source for everyone.

marvinn - February 6, 2011, 4:03 am

nice project but if you click refresh it will not clear the listview.. and the password of the account's isn't using a password char lol

Headmaster - February 6, 2011, 10:37 am

Awsome

but do you think its posible to add send or reply?

z3r0c00l - February 6, 2011, 11:15 am

Why do you give the Source only to Ub3rs and Leets?

If members can (like me) get the source easily?
No Offense just asking

TLF-KoBE - February 6, 2011, 12:11 pm

(Feb 6, 2011 11:37 AM)Headmaster Wrote: [\[CITE\]](#) Awsome
but do you think its posible to add send or reply?

Yes, I've added reply to my next release coming out. I had compose on there but decided to take it because I didn't think it would fit in well with the new release. I might decide to implement a Friends list similar to Mr. Predictable's release and add a compose option in. But for now I want this to be a complete separate project.

(Feb 6, 2011 12:15 PM)z3r0c00l Wrote: [\[CITE\]](#) Why do you give the Source only to Ub3rs and Leets?

If members can (like me) get the source easily?
No Offense just asking

I just didn't want a rush of people on HF to start releasing a bunch of HF pm grabbers.. It was more to just control the number of people that had it. I know its easy to get the source from it especially since I didn't obfuscate it.

Kotei - February 6, 2011, 2:34 pm

I'll take a look at this, if you don't mind.

TLF-KoBE - February 6, 2011, 2:52 pm

(Feb 6, 2011 05:03 AM)marvinn Wrote: [\[CITE\]](#) nice project but if you click refresh it will not clear the listview.. and the password of the account's isn't using a password char lol

Yeah, this was very early in development.. a lot of bugs have been fixed, as well as more features added.

(Feb 6, 2011 03:34 PM)Xypher Wrote: [\[CITE\]](#) I'll take a look at this, if you don't mind.
PM sent

xDowwdeen - February 7, 2011, 11:20 am

Please may i have the source to this.

z3r0c00l - February 8, 2011, 6:42 am

Don;t worry man,

I won't release the Source Code, I will just make my own PM Grabber but not for it to be released here

TLF-KoBE - February 10, 2011, 6:42 pm

(Feb 7, 2011 12:20 PM)iFlynn Wrote: [\[CITE\]](#) Please may i have the source to this.
The DL for the source is now in the main thread. Enjoy.
