Thread: [SMS BOMBER \[TUTORIAL\]](#)

paganxxxpride - February 1, 2011, 5:46 pm

!!WARNING!! SMS SPAM IS ILLEGAL UNDER COMMUN LAW IN MOST JURISDICTIONS! I AM NOT RESPONSABLE FOR HOW YOU USE THIS INFORMATION!!

I found an easy way to send someone hundreds of sms texts. And I will now show you how to do it

This Tutorial will teach you how to SMS bomb for free. And without untrusted software.

Things you will need

- 1.Mozilla Firefox Browser. [Mozilla Firefox Download](#)
- 2.iMacros Firefox Addon. [iMacros Download](#)
- 3.Free sms website with no login or captcha. [Send Free SMS Here](#)
- 4.Internet Access

STEP1. Open Firefox and navigate to [www.Send-Sms-Now.com](http://www.Send-Sms-Now.com)

STEP2. Open up iMacros by pressing the F8 key.

STEP3. Look to the left of your Firefox browser and you will see iMacros.

On the bottom of the iMacros you will see 3 tabs PLAY | REC. | EDIT . Click on the REC. Tab you will see buttons that say RECORD, SAVE, LOAD, and STOP. Click the RECORD button.

STEP4. After you press the RECORD Button look back at the sms sending website you opened earlier and you should see Country, Operator, Mobile Number, From, Message, and a Send Message button.

Fill out the information and click the send message button when you are done. The page should load and at the top it should say "Message Sent".(If you dont see the Message Sent at the top of the page then start over because you did something wrong.

STEP5. Look back over to the left at iMacros and click the STOP Button.

Then click the Save button and you will get a window that opens up asking you what you want to save it as. Type what ever you want and click save and close.

STEP6. Now click the PLAY Tab on iMacros and look at the top of iMacros and search for the file you just saved.(The one from STEP5.)

Click the file and then look down and you should see a PLAY, PAUSE, & STOP Button. You will also see a couple of textboxes to enter the number of times you want to bomb the victum with text messages. Enter the number of texts you want to send were it says Repete Macro

Max: (I usually put like 500 ). Then click the PLAY (LOOP) Button and kick back and let the sms bombing begin.

(IF YOU GET AN ERROR CLICK THE REC. TAB AND THEN CLICK THE CLICK MODE BUTTON

AND YOU WILL GET A POPUP. MAKE SURE THE "SELECT THE BEST CLICK MODE AUTOMATICLY" OPTION IS CHECKED AND FOLLOW MY TUTORIAL AGAIN AND IT SHOULD WORK.)

This Seems Like A Lot Of Steps Just To SMS Bomb Somone But I Promise You After You Do This Once Or Twice You Should Have It Down Packed. It Is Safer Than Downloading Third Party Software That Could Be Infected With A Virus Or Just Doesn't Work. This Should Work And Is Veary Easy and Quick After You Do It Once Or Twice.

I hope this tutorial will help some of you with sms bombing.  
Please comment if this tutorial helped you out.

PS- If you need any help post you question in the forum and I will be glad to help. Also it wouldn't be a bad idea to use a proxy when doing this. You can get a proxy from [HERE](#).

**mywhy10** - February 1, 2011, 6:09 pm  
Works. I can vouch for this.

**paganxxxpride** - February 1, 2011, 6:11 pm  
Yes that would be cool if you vouched for it.  
I'm glad you like it. its my first tutorial on HF so I hope it helps a few people.

**mm025679** - February 1, 2011, 6:14 pm  
I love you man lol you're great good job I love when us new members make good tutorials I havent yet tho lol well good job you should have way more hits replies and rep people just dont appreciate enough to reply

**paganxxxpride** - February 1, 2011, 6:18 pm  
Lol Thanx mm025679 I'm gladd you like it.  
I'm sure i'll get more hits and replies i've only had the thred up for about 20 min or so. I'm hoping I can make some more usefull tutorials that people like. I'm trying to earn my rep and learn as much as I can about anything computers and HF is a great place for that.

—

Jeeze 30 views and only 2 people liked this tutorial?  
I'm kinda disappointed. I was kinda proud of this tutorial, I thought more people would like this and comment on it.

**Cyber Freak** - February 1, 2011, 8:15 pm  
cool try mate.. but what actually the problem with this method method is due to loaded gateway or what it doesnt have that pace ... i mean it doesnt work that fast.. like normal SMS bombers.. the way i used for bombing is a bit difrent although it cost me a bit but my target feels like hell it almost hangs the cell phone:D

**paganxxxpride** - February 1, 2011, 9:06 pm  
Yes you are right it does'nt work as fast as a sms bomber program but that doesn't matter it works plenty fast to realy piss somone off. I did this to myself and I couldn't delete my messages fast enough. My message box was full.  
This will bomb fast enough and its free.

But I know what you meen mesulaiman it isnt as fast as a paid sms bomber but it is still awsome

and free.

**paganxxxpride** - February 2, 2011, 7:32 pm

not shure why its not working for you.

check the imacro recording settings and make shure they are set to SELECT THE BEST CLICK MODE AUTOMATICLY and make sure that on the sms sending website you have entered the right number with area code and the righ provider.

if you need anymore help pm me and i'll try to help you figure it out.

also it wouldnt hurt to go thrue my tutorial and make shure you followed everything right.

**apache** - February 10, 2011, 7:46 pm

Alright - I can VOUCH for this also! i take back my previous posts.

I WAS THE ONE DOING SOMETHING WRONG. -this totally works!

here is an amusing story on what i did with it at work yesterday:

I messed big time with some dumb bitch at work who thought she was a big pranker - using prankdial.com to prank someone and kept braggin' n shit...which is so lame... (PRANKING IS AN ART! COME ON!)

i just happened to have my laptop with me on that day. So i decided to send her 15 txts in a row from JIM saying : HI

she started wondering what was going on.

then i proceeded with 15 more, from JIM: I am on your facebook, you should not leave it open.

at this point she was freaking the fuck out almost crying and running around and then she came to see me since im good with computers (well, just more than an average person) She was begging me to stop the guy , and asking how to remove her facebook page from the internet (but not her account ) and remove the adress bar and a bunch of giberish that made no sense.

i told her i didnt get what she was saying and that shes crazy

then i went to text 10 more saying JIM: Forget it, you will never stop me

and at this point a was laughing so much that people knew i was up to something and figured out i was behind this. so they started saying it happened to them too and fucked up their FB and whatnots and she was going nuts man.

At this point, i walked in and sat on a table next to where she was standing and told her : So you were braggin' to be a big Prankster n' shit huh? well i guess this should teach you a little humility lesson and learn not too brag too much.

It was prety awesome. Everybody laughed so hard - it was great!  
I'm like that...You know!?

**Stenography** - February 12, 2011, 10:26 am

theres site that works for israel ?

**aisas** - February 12, 2011, 1:23 pm

It looks cool. But it probably doesn't work for my country. :(

EDIT: found another site. This is fun :)

**Valentine !! ?** - February 12, 2011, 11:50 pm

+1 It works. ;)

I tried it.

**hello23** - February 13, 2011, 10:37 am

hi,

it doesn't work :(

I sended a test sms to my phone, but i didn't get my test sms yet.

the website says: "The message was sent!"

**Stevdzaxx** - February 13, 2011, 12:53 pm

Nice work dude,its great :)

**paganxxxpride** - February 13, 2011, 8:40 pm

to Hello23 it does work you just have to make sure that you are filling out the right info. Make sure that you have the right provider selected and if you are in another country make sure you put what ever other information like the country code in.

Your Welcome Stevdzaxx I'm gladd you like it.

**pwndmin** - February 14, 2011, 10:39 am

Work like a charm

cheers and thanks

**A????????** - February 15, 2011, 3:23 am

3.Free sms website with no login or captcha.

There is no my country at options.

**paganxxxpride** - February 15, 2011, 6:59 pm

I dont quite understand what you are saying "Yck" but I think what you are saying is there are no SMS sending websites that have no login or captcha in your country.

What country are you in?

Also I dont know what I can do to help but let me know what country your in and i'll try to help you the best that I can.

Your veary welcome "pwndmin" I'm glad you like it.

I think its better than downloading untrusted software, you know that Mozilla Firefox and iMacro is not going to jack up your computer, But you never can tell with other software.

**tehdon** - February 15, 2011, 7:52 pm

This works fantastic sir. Thank you!

**Mr.Oug** - February 15, 2011, 7:59 pm

Dosent work for india any other options mate..?

**lemnyscate** - February 15, 2011, 11:49 pm

u can do tamperdata here alos a plugin for firefox

**paganxxxpride** - February 16, 2011, 9:44 pm

Oh ya thats actualy a good idea.

I have TamperData I never even thought of useing it for that.

Great idea "lemnyscate" , I'm ganna try it out.

Thanx for the idea. Your welcome "tehdon" I'm gladd I can contibute somthing to HF.

Hmmm. "mroug" I'm not realy sure why it doesnt work for India , You might want to try and find a sms sending website that lets you send sms to India. otherwise i'm not sure what else you can do but to download a sms bomber that works in India. also u might try "lemnyscate's" idea and use TamperData. I'm pretty sure Gmail letts you send sms (Google).

**lxx\_lord\_xxll** - February 17, 2011, 12:25 am

Also u may use WPE Pro to send packets :D

**Anonymous404** - February 17, 2011, 2:13 pm

Looks really nice.

But don't want to get in trouble, so won't even try it.

Cheers.

**paganxxxpride** - February 17, 2011, 10:50 pm

You know it is fine if you are just useing it to play a prank on one of your friends but if you use it to harrass people that you dont know or people that dont take kindly to jokes than you could get in trouble if they report you.

But its fine to use it on your friends, Just make sure they can take a joke.

I've used it a million times on friends and even on a few people that I didnt care for too much and no one turned me in for it.

I'm sure you have friends that would think it was funny.

**andreinescastro** - February 18, 2011, 1:22 pm

In my country the email to sms feature doesn't work.

Works in any of your countries?

**superbadsonic** - February 18, 2011, 2:59 pm

this works like a charms thanks so much, this is a good prank to pull on someone

**GunBenefits** - February 18, 2011, 5:32 pm

I got it working, But how do I get it to send it more than once?

I entered in 20 times yet nothing happens? THIS IS LEGITT!!! I GOT IT TO WORK BEST THING OUT THERE FOR SURE!!

**romiojithu** - February 19, 2011, 1:52 am

"The message was sent!"

this message shows . but, the message is not deliver in reciepients number.

**paganxxxpride** - February 19, 2011, 2:11 am

If you put the right number and the right provider in and the person still did not get the text, then they probably cant receive text msgs.

If you are in a different country other than the usa you will also have to enter in the country code.

if you dont know who the persons service provider is go to [phonefinder.net](http://phonefinder.net) and do a reverse cell phone lookup.

**DaRkStEel** - February 19, 2011, 4:01 am

Hi all cant get the site to send any sms well it sends them but i dont receive any can it be to any phone including old ones or do they have to be newish? please help cheers \$teelerLeigh

**-| Cancer** - February 19, 2011, 4:46 am

PLEASE RATE 5 STARS.

Easy tut is EASY

**andreinescastro** - February 19, 2011, 6:24 am

(Feb 19, 2011 05:46 AM)-| Cancer Wrote: [\[CITE\]](#) PLEASE RATE 5 STARS.

Easy tut is EASY

Yeah, the TUT is great!

But the gateway (email to sms) uses XX@sms.provider.XXX. This doesn't work in some countries.

**paganxxxpride** - February 19, 2011, 11:10 pm

SteelerLeigh it doesnt matter if the phone is old or new. Just as long as it can receive text msgs and make sure that the sms site has the person's cell phone provider, also I have been told that this does not work in some countries , I know it works in the USA and Canada but i'm not sure about other countries.

Make sure that when you send a sms msg that you put the persons cell phone provider in.

If you dont know who their cell provider is go to [PhoneFinder.net](http://PhoneFinder.net) and enter in the persons cell phone number and it will tell you their provider.

I hope this helps you.

And to everyone else I am glad that you liked my TUT thanx for the great feedback.

**andreinescastro** - February 20, 2011, 6:05 am

Anyone knows a free sms gateway that works worldwide?

We can bomb a mobile phone using auto-clicker in that gateway setting the interval to 1 ms, for example.

**paganxxxpride** - February 20, 2011, 9:17 pm

I'm not sure an auto clicker would work because for every sms you send you have to fill in the info, Country, Provider, Number, From, Message. Unless you found a website that doesnt reset the the page after you send the sms.

I know there is software out there that claims you can send free sms worldwide but I'm not sure how true this is, I'm also not even sure the software is safe to download.

**OvchArka.** - February 21, 2011, 6:46 am

cool man, thanks for the tutorial.

**andreinescastro** - February 21, 2011, 6:57 am

(Feb 20, 2011 10:17 PM)paganxxxpride Wrote: [\[CITE\]](#) I'm not sure an auto clicker would work because for every sms you send you have to fill in the info, Country, Provider, Number, From, Message. Unless you found a website that doesnt reset the the page after you send the sms.

Yeah:

1 - We'll have to find a worldwide free sms gateway. ( [www.delesms.co.uk](http://www.delesms.co.uk) worked for me in the past, but today doesn't work)

2 - Find a vulnerable sms gateway to use the autoclicker.

**Lowbob4ever** - February 21, 2011, 12:16 pm

Dude, this works really great. 100x better than all progz i know. Thanks a lot...keep goin on doing such a great work.

greetz Lowbob4ever

**paganxxxpride** - February 21, 2011, 8:51 pm

I'm gladd that you all liked my tutorial.

I will try and find some sms sites that will work for other countries but I cant test them out because I dont know any

cell numbers out side of the usa, So If I come accross any sites that claim they send sms to the uk india canada and other countries I will post them here for you all to try out.

Thanx again guys for the positive feedback.

**nurries** - February 22, 2011, 3:23 am

How often can I send free SMS?

You can send up to 10 free SMS text messages per day from the same IP address. Also, the number of messages to the same phone number sent by different users cannot exceed 10 texts per day.

**paganxxxpride** - February 23, 2011, 12:47 am

I'm not sure but I did it to my sister inlaw and I set the imacro loop to 50 and she got all 50 of them. so it worked for me just fine. it should work the same for you.

**stancy** - February 23, 2011, 7:49 am

You can send up to 10 free SMS text messages per day from the same IP address. Also, the number of messages to the same phone number sent by different users cannot exceed 10 texts per day.

**expl0rer** - February 23, 2011, 10:32 am

Aww too bad that this doesnt work in finland. TESTED.

**andreinescastro** - February 23, 2011, 11:09 am

(Feb 23, 2011 11:32 AM)expl0rer Wrote: [\[CITE\]](#) Aww too bad that this doesnt work in finland. TESTED.

Yeah, this doesn't seem to be a worlwide service.

**paganxxxpride** - February 23, 2011, 6:32 pm

I'm not sure how often you can send sms.

Like I said before I sent 50 of them to my sister in laws phone from the same website same ip extra and it worked for me

She got all 50 of them. So if you do it exactly how I did in my tutorial there should be no limit but i'm not sure so  
don't quote me on that.

Ya I'm sorry explorer it only seems you can do this from the US And Canada. Unless you can find a sms service in Finland that has no login or captcha.

**andrewxagony** - February 24, 2011, 12:02 am

Beautiful post. Thank you.

**Secret.** - February 24, 2011, 12:27 am

Holy shit man thanks it actually works :)

**plkkill** - February 24, 2011, 11:24 am

SuPerb , Awesome dude..

Love it..

**Jery Sein** - February 25, 2011, 2:35 pm

Thnx man!..nice job!...I alwyz wished 4 smthing lyk dis...now I have it...Thanx 2 U!!..

**paganxxxpride** - February 25, 2011, 10:18 pm

You are all very welcome.

I'm glad that so many people found this useful.

I just like to contribute good stuff for other HF members to use.

Thank you guys for the positive feedback.

If you have any questions I would be glad to help out, all you have to do is ask.

**Mag1c-Pot** - February 26, 2011, 7:49 pm

Shit. I'm bookmarking this to read later! Although I bet it only works in your country...

**ltrace** - February 26, 2011, 10:32 pm

the sms website doesn't load

**paganxxxpride** - February 26, 2011, 10:50 pm

What country are you in PsychoMantis?

I know for sure that it works in the US and Canada. I'm not sure about other countries, Just try to find a website that offers free sms messaging in your country with no login or captcha.

Also ltrace What do you mean the site does not load? It might be your computer because I haven't heard of this happening to anyone else before.

Also if you can't get the sms site to load then search google for a sms messaging site with no login or captcha.

If you have any other problems or questions feel free to post them here or pm me and i'll try my best to help you out.

**ethico** - March 3, 2011, 1:09 pm

nice work buddy..

thanks for share..

**paganxxxpride** - March 4, 2011, 12:20 am

Your welcome ethico I'm glad you like it.

**Certified Ethical Hacker** - March 5, 2011, 4:57 pm

the Country, Operator, Mobile Number, From, Message, and a Send Message button does not appear

**imnotorious** - March 5, 2011, 10:59 pm

supa awesUM :D  
longing :DD

**paganxxxpride** - March 6, 2011, 12:24 am

Does not appear on what?

You know that the Country, Operator, Mobile Number, From, Message, and a Send Message button are on the webpage and not on iMacros right?

When you go to the sms sending website you will see 5 textboxes and at the bottom of the page you will see the Send Message button.

If you are having problems with the webpage not loading then use google to find a different website that offers free sms with no login or captcha. But before you do make sure that you are on the right page (<http://www.send-sms-now.com/>)

If you are still having problems feel free to ask me and I will try and help the best I can.

And I'm glad you like it imnotorious

**bevsta123** - March 9, 2011, 4:34 am

idk i tested on myself and it hasnt worked for me? (im Australian)

**paganxxxpride** - March 9, 2011, 7:18 am

Ya you might just have to find a sms sending website that works for Australian numbers. I know for sure it works in USA and Canada.

**T@M3R** - March 9, 2011, 8:04 am

Can be useful for something else :)

**bevsta123** - March 9, 2011, 6:53 pm

i dunno i tested this on myself and havnt gotten the text for like 12 hrs now lol, all details are suppose to be all right?

**paganxxxpride** - March 10, 2011, 5:43 pm

Ok bevsta123 The first thing you want to check is that all the information you entered into to sms sending site is corect.

If all of you information is corect try not useing iMacro, just open up the sms site enter your information and send yourself 1 text msg. If this works then check iMacro's click options to make sure they are set to "SELECT THE BEST CLICK MODE AUTOMATICLY" and try again.

if this does not work make sure that the sms site works in your country. I know it works for USA & Canada but I am not sure about other countries.

Also you can try to find another website that offers free sms sending with no captcha or login.

I hope this helps you out, And if it still doesnt work let me know and i'll see what else I can do for you.

ANOTHER FREE SMS SENDING WEBSITE [HERE](#)

**Boxing** - March 11, 2011, 4:03 pm

this is def a working good idea, like previously said it isn't as fast but aas it looks by reading your thread iMacros records mouse movements so if you move really fast on a run you could get it pretty fast im sure though nice guide.

**paganxxxpride** - March 12, 2011, 12:50 am

Ya its probably not as fast as some sms bomber programs but it is fast enough to do the job.

I meen you will get 1 text after another, It bombs fast enough to were the victum would not be able to delete the msgs fast enough so it works and you know you can trust firefox and iMacro as far as viruses go.

The only thing is it doesnt work in a lot of countries. But you can find a sms website that will send sms to other countries.

Thanx Again To Everyone For All Of The Positive Feedback.

**marchbob** - March 12, 2011, 1:20 pm

It isn't working. I send it to myself but idk why it isn't working... help?

**paganxxxpride** - March 12, 2011, 4:47 pm

What country are you in marchbob?

Because this does not work in some countries, I can only vouch for USA and Canada.

Make sure you are using the right click mode on iMacro and make sure you are entering the right information in on the sms site.

Also try sending yourself only 1 msg without recording with iMacro and see if you get it.

Then if that works it meens that your iMacro settings are wrong but if it doesnt work it meens that you are either entering in the wrong info or the website is not working.

If the website isnt working try finding anothher sms sending site with no captcha or login.

**marchbob** - March 13, 2011, 12:41 pm

(Mar 12, 2011 05:47 PM)paganxxxpride Wrote: [CITE](#) What country are you in marchbob?

Yeah I am in the USA and it is not working on my phone or my friends. I tried a different site and it

worked but it has capatcha

**paganxxxpride** - March 14, 2011, 12:53 am

Ok just use google to find another site with no login or captcha.

Here is one I just found <http://www.txt2day.com>

**Justinz** - March 14, 2011, 7:04 pm

This only works for phones that approve email to sms. but if they are already approved it works so thank!!!

**F0UNDER** - March 14, 2011, 7:25 pm

i had already posted this TUT long time back ..

<https://hackforums.net/showthread.php?tid=991316>

nevermind still a nice effort ..

**paganxxxpride** - March 14, 2011, 11:27 pm

I promise you [www.thepiratecrib.in](http://www.thepiratecrib.in) that I have never seen your tutorial on this. I am no skidd.

I just was playing with iMacro and I found out how to do this so I thought I would share it on HF.

**paganxxxpride** - March 19, 2011, 9:49 pm

Ok Guys the original sms site I gave you is now requiring login. So I found this site>>

<http://www.txt2day.com/> .

Wich workes even though it has a security question it askes you what >> 1+6= << or similar.

But that doesnt matter you can still use that site with my tutorial.

This site >>> <http://www.txt2day.com/> <<< Works as of 3/20/11

**Threadlocks** - March 21, 2011, 12:45 pm

Super good guide i used it agaist myself and my screen froze and stuff had to take battery out and put back in lol. 5/5

**paganxxxpride** - April 15, 2011, 8:43 am

Thats funny. I'm gladd you liked it OUTLAWZ.

**Dawn of War** - April 15, 2011, 2:39 pm

Thanks for sharing this mate, very helpful :D

**paganxxxpride** - April 16, 2011, 12:56 am

Your welcome Dawn of War. I'm gladd you all liked it.

Thanx for the positive feedback.

**rahulkumar1234** - June 14, 2011, 11:04 am

This tutorial is great but i cannot find any non captcha -non log in site with Indian service providers. Mainly I require Airtel and Vodafone for Delhi, India.

So this ain't working for me. help me

**rahulkumar1234** - June 16, 2011, 3:04 am

jst hope dis wrks....m fed up wid spams shit..

**paganxxxpride** - August 17, 2011, 11:16 pm

I'm not sure if this works anymore because I made this tut a while back. A lot of sms websites use a captcha now. But if you can find one that doesnt use captcha then it should work.

**TITAN** - August 18, 2011, 1:22 am

does this still work? i am trying it not sure if it works

**paganxxxpride** - August 18, 2011, 2:27 am

Im not sure. I think it still works but you will have to find another sms sending site that does not have captcha.

If you find a sms site with no captcha then it should still work fine.

**Grimro** - August 23, 2011, 5:50 pm

This is really cool, can't wait to try it

**paganxxxpride** - August 24, 2011, 1:15 am

Thanx I hope u like it. Just ake sure you use a sms website that does not have a captcha. I think the website I provided has a captcha now. S ojust find one that doesnt and you should be fine.

**killerbooter** - August 24, 2011, 12:41 pm

thank u for diis i really needed diis information =D

**Complextion** - August 24, 2011, 1:57 pm

Definately works, nice tutorial thanks for sharing

**Swur** - *August 24, 2011, 11:18 pm*

I keep getting error to recieve data or something like that. Help!
