Thread: [ARES HTTP Bot & ARESRat Java Sources **PRIVATE RELEASES**](#)

ASMAteMe - February 1, 2011, 8:11 pm

Hey all!

I purchased these sources off of Cascade around a year ago with hopes of further developing them & selling them in the market place. However considering I was not successful at finding a Java programmer that was willing to work with me I have no choice but to release these..

I attempted to sell these sources for the past few months with no avail & I figured this would be a great release for the public!

I paid a little over \$700 for the following sources & can assure you these are no slouches!

The ARESRat is 100% FUD, however the HTTP Botnet is 4/20. All were scanned on NTV!

Links to the original sales threads from Cascade can be found here:

<https://hackforums.net/search.php?action=results&sid=18b4845c7279ccb24fdb2f74604aed91>

I will NOT be uploading them via sharecash, I am going to use megaupload!

Please, if you use these as a base or for learning give credit where credit is due! All I ask is if you continue the projects to let me know as I would love to check out the finished product!

With that said, I hope this makes someones night! Enjoy it!

I am uploading the ARESRat, ARES HTTP Botnet, & 2 MSN bot sources. The MSN Bots work 100% & feature a massadd & freezer along with a shitload of other features.. I also included a copy of JShrink for those that would want to convert the JAR's to EXE's! It also includes BOTH of the PHP sources, which include the 1st version & the updated final version 2.

Everything you need to get started!

Remember it needs to be compiled using a JAVA Compiler!

How to remove the bot:

HKEY_CURRENT_USER, then Software, then Microsoft, then Windows, & click the Run folder

Javaupdate -> Kill it

Also, check your process list and kill -> Java or Javaw.exe

Tasemu - February 1, 2011, 8:15 pm

Checking this out right now. If its as good as you say it is then you deserve a pat on the back for a good share. ^^

LxeProxy - February 1, 2011, 8:37 pm

Thank you. Downloading now.

ASMAteMe - February 1, 2011, 8:39 pm

I can assure you that everything here is 100% private until now.. I can also assure you that ARES HTTP Botnet is extremely strong & efficient.. I was working with ZA!N & a few others off this site testing its strength & with a little over 50 bots was able to take down some pretty serious sites, including game-deception along with a few others =D

MasterFer - February 1, 2011, 10:59 pm

Thanks. I am checking those files.. They look amazing.. :D

Thanks again to sharing with us..

ASMAteMe - February 2, 2011, 12:17 am

I appreciate the comments, if anyone wants to speak to me they may contact me via MSN @ ASMAteMe@hotmail.com

Thanks again!

Infected™ - February 2, 2011, 12:28 am

I'm gonna check these out now thanks for the generosity and for uploading to MU completely free release You deserve more than green apples :)

03storic - February 2, 2011, 1:53 am

Compiling Java is a bitch...

Can someone help me out or do it for me?

Infected™ - February 2, 2011, 3:47 am

Does anyone know how to compile this properly? I've changed the check in url and command source in constants.java and then i tried to compile it on my mac using the command

Code javac -classpath . Main.java

but to no avail it comes up with 15 different errors, I've tried to fix them but I'm not sure how to because I'm not a java programmer so any help is appreciated thankyou :)

ASMAteMe - February 2, 2011, 9:34 am

I appreciate all the feedback! I hope you guys enjoy these releases!

ASMAteMe - February 2, 2011, 11:00 am

I was just testing the flood strength because they use a anti-ddos host. I used to code with a few members off of GD, Hybrid, osGb`, [ELF].. As I used to be in Digital Death.

Deadlydennis - February 2, 2011, 12:54 pm

can someone right a tut on this or something i know nothing about java and dont know how to compile it

theclowen - February 2, 2011, 1:02 pm

cant download .. Deleted :| .. some one upload it plz .. thanks so much for owener :)

Hazelfox - February 3, 2011, 8:28 am

Thank you, how many bots the HTTP bot can hold?

ASMAteMe - February 4, 2011, 10:56 am

At one point I had over 6,000 bots on the http bot with no problem!

f?????? - February 6, 2011, 3:29 am

would be nice to know how to compile, im an avid java user and it still wont compile in netbeans:(

ASMAteMe - February 8, 2011, 1:55 pm

Thanks for all the feedback guys! hex0 speak to Fizzix, he would be able to help you I am sure!

GaMeR™ - February 8, 2011, 2:03 pm

Java bot = FUD amirite?

shadow_69_91 - March 29, 2011, 5:44 am

I agree. Please re-upload as I would like to play with the code :)

ASMAteMe - March 30, 2011, 4:13 pm

I apologize guys, I had some business to attend too so as soon as I get access to my machine it will be up, again sorry!

-=HeX=- - March 31, 2011, 2:48 am

Will be keeping an eye on this...

Valour - March 31, 2011, 3:17 am

MU link down..maybe you could reupload it ...

Aeon-Ev3L - March 31, 2011, 3:17 am

thank you sharing guy ?

Rhythm - March 31, 2011, 12:37 pm

I'm actually impressed with the strength. Looking forward to the reupload.

ASMAteMe - March 31, 2011, 2:10 pm

The strength still is unmatched when compared to other botnets out there.. I wish I wouldve kept these private but I have no use for them as I am not a programmer and lost my only developer due to his real life work...

Will be up by Wednesday guys!
