Thread: [\[Spam service #2\] \\$0.20 per download, service re-opened !](#)

Madlife - February 2, 2011, 9:22 am

Hey guys,

I've already started a sharecash service in the past, \$0.10 per download, but stopped it because I was getting almost nothing while I was working as hell.

So now, I re-open that service for people to get their files downloaded in safety.

About downloads:

- You will have to provide me as many links as downloads you want me to make. That means if you buy 5 downloads from me, you will provide 5 links, etc ...
- Every single download will be made with different and unique IPs and Mac addresses, and I take time before unlocking surveys, so that seems fucking real for \$sharecash.
- I'm not responsible if you get your account banned or if you get into any trouble. If you don't do anything blackhat by yourself, you won't get into trouble. That sentence is just to be sure that you won't say anything if you get into trouble with your account, because all would be your fault.
- All downloads are done from France.
- I do not use any Proxy or VPN or anything else. All IPs are different, but are still mine.

About prices:

- I take payments only from both AlertPay and PayPal.
- Monet MUST be sent as a gift(via Paypal) or as a service(via Alertpay)
- Every download gives you, on average, \$0.40
- I won't do more than 5 downloads/day/user. That is just for your safety. So, if you ask for 15 downloads, you will have to wait 3 days for them to be completed. I may be able to do exception at the ends of month.
- Here are prices:
 - 1 download: \$0.25
 - 5 downloads: \$1.10
 - 10 downloads: \$2.00

If you want to buy downloads:

Here is both my Paypal and AlertPay ID: junk.advert@gmail.com

You will have to pay me the right amount of money, copy the transaction details, and then send me a PM.

Here's what the structure of the PM must be:

- Hackforums Username:
- Number of downloads you just bought:
- Transaction details:
- Links to downloads:
- Code I've read Papnaruto's whole post and I know everything about his service. I bought downloads knowing that it is not allowed by \$sharecash. If anything happens, anything that would happen to my account is my own fault and Papnaruto has nothing to do with that. -You can add a personal message, that's always sympathetic and appreciated from people :)

Now that you know everything about that service, feel free to PM me.

Pap'.

Vouch for this Guy ,He is Legit

Madlife - February 4, 2011, 9:26 am

Had a smooth deal with AnyGoodUsername? :)

Harsh Gupta - February 5, 2011, 2:48 am

Hey reserve 10 downloads for me till tomorrow

because i can not purchase your service right now because share cash has some problem with their uploading script.

Madlife - February 5, 2011, 5:34 am

That's okay, you'll send me a PM when you've paid and you want them :)

Pap'.Still waiting for customers, have done 2 smooth deals with AnyGoodUsername?

Waiting for others,

Pap'.Still waiting to buy fast service !
