Thread: Free file protector .bat (password)

osidrusher - *January 12, 2014, 10:37 am*

i have made a simple batch password protector for anything on your computer....

NOTE
This password from batch is only to keep family, friends, and random users away from that file... Hackers could infiltrate the password if they tried to

Keep things a secret and private.. this batch file keeps whatever u want hidden until you enter the password you had created inside of it

Code
```
cls
@ECHO OFF
title Folder Private
if EXIST "HTG Locker" goto UNLOCK
if NOT EXIST Private goto MDLOCKER
:CONFIRM
echo Are you sure you want to lock the folder(Y/N)
set/p "cho=(more than)"
if %cho%==Y goto LOCK
if %cho%==y goto LOCK
if %cho%==n goto END
if %cho%==N goto END
echo Invalid choice.
goto CONFIRM
:LOCK
ren Private "HTG Locker"
attrib +h +s "HTG Locker"
echo Folder locked
goto End
:UNLOCK
echo Enter password to unlock folder
set/p "pass=(more than)"
if NOT %pass%== "ENTER YOUR NEW PASSWORD HERE" goto FAIL
attrib -h -s "HTG Locker"
ren "HTG Locker" Private
echo Folder Unlocked successfully
goto End
:FAIL
echo Invalid password
goto end
:MDLOCKER
md Private
echo Private created successfully
goto End
:End
```
guys where it says in caps > "ENTER YOUR NEW PASSWORD HERE" that is where you edit and

put the password you want

Made a super exploit. I can unlock it without the password. It's amazing.

Code attrib -h -s "HTG Locker"

Code attrib -h -s "HTG Locker"
i just made this for hiding folders and programs from family, friends, and just other people that wouldnt know how to find out about what your up to. this isnt a pro password from hackers haha

Thomas446 - *January 12, 2014, 11:26 am*
well good thing you absolutely skidded this from howtogeek.com

http://www.howtogeek.com/105633/how-to-create-a-password-protected-folder-without-any-extra-software/
It even says HTG LOCKER in "your code"
HTG stands for
How
To
Geek

Code attrib -h -s "HTG Locker"
HOLY SHIT DUDE!
I'm pretty sure it's an 0day exploit, you've must sell it for private!
till it get leaked ... when it will you can put it on ExploitDB..

I've actually been selling it already on a underground hacking forum. I've earned $50K from it but sales is going slow now so i thought I'd give it out for free. ?

Woha Thanks dude! That would be very helpful for me .. I'm sure I can Hack now the FBI and the NSA because they use the same method to hide their information from us, Thanks!! ???

osidrusher - *January 12, 2014, 3:26 pm*
wish i had more feed back on this :(

Wish skids wouldn't copy and paste the same code over and over again. :(

King of Clubs - *January 12, 2014, 3:56 pm*
Haha. This is so skidded. Please at least give credits and don't act is if was you who coded this.

Grand Mirasou - *January 18, 2014, 11:22 pm*
Interesting, will easily baffle any normal person trying to get into something

nickchan - *January 19, 2014, 6:30 pm*
Well I have two ways of getting around this
Right click edit with notepad
Get the password

Use winrar >.<

Jamescanhack - *January 22, 2014, 6:03 pm*
how do you use it to put passwords on files?

B1234m1234W - *January 23, 2014, 6:01 pm*
Because this code is the same as where OP copied it from (http://www.howtogeek.com/105633/how-to-create-a-password-protected-folder-without-any-extra-software/) character by character, I'm assuming that you didn't have enough knowledge of batch to have the courtesy not to blatantly steal. Therefore, why even ask for any feedback, fool? You're getting enough already and its the negativity that you deserve.
