Thread: [Ideas Ideas Ideas...](#)

okmijnlp2 - February 3, 2011, 4:56 am

Ok guys! I need ideas on what to make, I want to make something new because im bored out of my brains with nothing better to do. I dont want to make something that someone else has made - What would be the point in that? XD

So, I'm not asking you to give up all your wonderful ideas of your own :)

I Just want a pointer to tell me what you would like me to make for the community.

Thank you guys!

p.s. Im not the best coder in the world but ill try my hardest :)

Make a nice simple game. Take a look at my TicTacToe tutorial [here](#), and do it in VB(if that is your language).

The only problem is, when you find a prblem, somene else has already fixed it, and i cant fix that problem ?

Toph Beifong - February 3, 2011, 11:23 am

yer someone may have already fixed the problem but you have to just make a better improvement.

if you dont know how then learn.

but anyway im off to carry on learning perl
