Thread: [\[HOW-TO\] \[PAYPAL\] Make Money Using Your Ipad Touch / Ipad / Iphone \[FREE!\]](#)

airjosh97 - February 3, 2011, 2:19 pm

THE SITE HAS CHANGED! You can now get gift cards too!

[Video: <http://www.youtube.com/watch?v=FY-ECGGUiQE>]

This method involves downloading and installing free apps, theres nothing else to it!

Step 1: On your device, go on safari and type in <http://bit.ly> [WARNING: potentially infected]/e6UcKh

Step 2: Register, You only need an email and a password, keep in mind that the email you use will have to be your paypal address, as thats where they send the money.

Step 3: They will then ask you to install there bookmark, do so following the instructions.

Step 4: You will then be asked to install their script thing, go ahead

Step 5: Go to the app list, click on "Enter Bonus Code" and use the promo code "judgemoon" for extra points.

Step 6: Go ahead and start downloading some apps!

Step 7: Post here saying thanks and keep this thread alive!

### INSTALLLOUS:

Installous only works with SOME of the paid apps, but feel free to try:

Download the app from installous (don't install it yet)

Go onto appredeem and follow the link of the app you previously downloaded

When it redirects you to the AppStore, multitask to installous and install the app

Close installous and run the app

Keep the app running until you get an email from appredeem.

This only works for a few apps, but can quickly get you a few dollars

Like in my case a mobile number is like 0612345678 so i enter 0612345678 (not my real number ;)  
)

so not entering with country code like in my case +31612345678 or 0031612345678 or as  
612345678

The "code" that they send you is actually a activation code making them able to take money from you at any time...

Just warning you all since I got into that mess myself some time ago ;/

Dont bullshit.

The only way that anyone can take money from you via text is if you reply, which in this case you dont have to, they send you the code, you put it in on the site.

If that did happen to you, it wasnt on this site, so gtfo.

What do you mean paid apps? You get paid to download paid apps? =S

Or they have a separate section for normal apps, and one for free apps that you get paid to download?

EDIT: I dont doubt that this method does work, however it doesnt seem to be for me. I have done everything and verified my phone number and downloaded more apps after, it says i have made \$1.15 but hasnt sent it and its ment to within 1 minute

Theres 2 different ways to make money on this.

1. You download the apps labeled "free", and get paid for them (they cost nothing to download)
2. You can download paid apps, and get paid for them, for example the app costs \$1.00, but you get paid \$2.00 when you download it.

This is so fishy now, i got paid 1.50\$ and then i earned some more points i currently have 1100 points but when i redeem it says your account has been compromised. I emailed them immediatley and they sent an email back the next day saying 'Your account will be unbanned soon, this issue has been resolved' Nothing after that day. I emailed them last Saturday and i have not gotten an email back. I think people advertising are getting money for this and people using don't after they first redeem or something, idk.

This is a legitimate website but they never update their apps you have to wait weeks until new apps come out and I really need the money to pay games and other important stuff that I need.

My account has been compromised I contacted them 3 times they said they restored it but it still doesn't work so I contacted them again and I am waiting for my email. How am I compromised if I never been hacked before?

A new free app just went up, Lyric Legend, worth 16 points.

Has anyone had problems getting Tiny Zoo or Mini Cafe to credit? I've tried deleting and redownloading, and it doesn't work.
