(Mar 22, 2014 02:07 AM)Tier Wrote: *[CITE]* My name is Tier and I will be reviewing this product. Before I start I must add that the user PMed me privately to review this product without me even asking. This to me says that he values my opinion over those who just want to leech a free product; however, the most important note is that i have never spoken with this user before. This is my 100% honest opinion in which I am giving as a favor to the OP.

This review will be modified from my usual format simply because it is laid out in a different manner than your average "guide" in a sense that it is an assorted collection of other guides. I will not give this a score, rather I will offer information in regards to the package as a whole.
For the users who are stubborn and want a numerical value, I'll give this a rough score of:
Overall: 8.5/10

Originality:
The only thing lacking in this guide is originality simply because it is a compilation of guides that are somewhat unoriginal. Don't get me wrong, it's not just a collection of public information. Some of the material is original, quality material. Some isn't.

Organization:
The programs, guides, links (and more!) are organized on the website which you receive a login to. I must say that the organization is done quite well, and I'm pretty hardcore about organization. The site is by no means "beautiful" but the content is all there and it's easy to navigate the site and find what you're looking for.

Pros:
This literally lays out EVERYTHING you could ever need to get started in marketing, general business, and "monetization" as defined by the general HF user.

Cons:
While this doesn't technically offer any real detriment to the user's experience, it must be noted that OP (probably) doesn't have the rights to pass out everything that he is passing out. If proven otherwise, I'll gladly change this statement. Other than the possibility of OP pirating software, there are no real downsides as far as I'm concerned.

Post-note: I guess you should know that since this is a web-based collection of information, you will need an internet connection to view and download the materials for the first time. Not that anyone should really find it a problem, but it's worth a mention.
