Look at his second post in this thread, he quoted himself but changed the link once it went down. PDF is downloadable after you went through the affiliated links. Method seems legit, idk if this is originally his but it looks like he is just spreading the method in order to increase his chance to get more referrals.

I scanned the downloaded file from the second link from hist second quoted post on VT and I saw it was scanned in the past with zero detection, it is still 0 detection https://www.virustotal.com/gui/file/c78f5330d7c660f101779b3709619225b8097b8bc6d9ca5fb2a600dfdeec0d25 it could be clean, but I recommend opening this in virtual machine.

If anyone goes checking this method, let us know here your experience.

Anyhow, thanks for sharing OP.
