Thread: [-*...I Need HELP to use a RAT...*-](#)

DavySnake - February 3, 2011, 3:28 pm

? HI !

Is it very important to port forwarding ??

How do I custom my server to give it an attractive look and what is the easiest way to spread it ??

(I will use DarkComet)

DaddiesSauce - February 4, 2011, 1:47 pm

Hello!

1. Yes, port-forwarding is very important, you can't RAT without doing it.
2. Not too sure what you mean, do you mean modifying a program for looks or what?

g0han - February 4, 2011, 2:00 pm

YOU must PORT FORWARD OR IT WILL NOT WORK

The file is invisible, they open it and theres just nothing. You can however bind it to another file, just search for binder

Virtualization - February 4, 2011, 2:09 pm

Every device has at least one IP adress which are divided up into many ports. When you send data from one computer to another it sends it from port to port. A port can be used by one program at a time. When a computer on the internet sends data to the external IP adress of the router it needs to know what to do with the information. Port forwarding tells the router what to do and where to send the data to. So yes, port forwarding is important in this case.
