Thread: Sellan | Acpt OMC, BTC, PP | Affiliate, Feedback Sys | Sell E-books, Codes, Netseal++

King of Hearts - *May 11, 2014, 6:14 pm*

I'm on vacation. This site will continue to operate and will be administered by an irl friend of mine (he doesn't use HF). He has access to all emails, databases, servers, etc.

For help, please contact us using the http://sellan.net/contact page.

Hey,

I'll have a thread design up later on but for now here we go: https://sellan.net

Sellan is a new e-commerce solution for those who'd like to accept multiple types of currencies and paypal and sell digital content. You can sell many types of items (including but not limited to e-books, downloadable items, codes, unique items separated by commas, custom software including licensing support using the custom feature, and much more).

If you'd like more info visit: https://sellan.net/features

If anyone wants to see the service in action first, I've added some test products for you to use.Rose picture ($.01).

Custom Note. Limited Quantity. ($.01).

Get an e-mail containing Google.com's source (testing the function bit use file_get_contents). ($.01)

It will save a lot of time for the sellers. Better than "to buy with btc/omc pm me" thing.
Really everyone should start using it. I will if I have a product to sell!

I'm glad you guys like it.

As for the security measures, I'm adding one to two more layers and then I'll have someone pen test it and give me recommendations.

Before that however, I'm switching the servers to OVH.

If you need anything please post here or pm me.

Yes. Each buyer will be emailed a unique id. To do this, first click on add a product. Then change product type to Accounts/codes/serials/etc. Then add the xbox live codes in the space provided, separating each code with a comma. There are a couple of people who use this site to sell xbox live codes.

Does your system include a payments table that:adds all payments up

Keeps track of users refunded

Keeps track of disputes

Keeps track of users who won disputes & users who lost disputes

Separate payment calcs for different payment processors, ex. PayPal, BTC, LTC, etc.

Something like that? If it included a nice table like that with a bit more, I'd buy into it.

Keeps track of users refunded I don't have a refund option. So N/A

Keeps track of disputes I don't have this because the money is sent from coinpayments. N/A

Keeps track of users who won disputes & users who lost disputes

Separate payment calcs for different payment processors, ex. PayPal, BTC, LTC, etc. At the moment, no. I'll add it in a bit though.

Something I'd suggest anyone currently using sellfy or services alike to hop on over to. No fees here, and a lot easier to work with.

I've added an affiliate system. Here's more info:

Quote:When adding a product, you can choose if you want users to be able to create affiliate links for the product. If you check the checkbox, on the product page there will be a link "Become an Affiliate". The link will open a popup box which will allow anyone with a paypal address to become an affiliate. Once an affiliate enters his/her email account, he is sent an email with instructions (login information and affiliate url). Whenever a buyer buys a product through an affiliate url, the database is updated and the number of Sales and number of Unpaid Sales are both incremented. Once a merchant pays his affiliate, the merchant can reset the number of Unpaid Sales to zero. To prevent merchants from scamming affiliates, every time a buyer buys a product through an affiliates url, the affiliate is sent an email.

King of Hearts - *June 25, 2014, 7:48 am*
I've also added a custom feedback feature. Buyers will be sent a unique id and password with which they'll be able to leave merchants feedback.

King of Hearts - *August 12, 2014, 6:45 pm*

I'm on vacation. This site will continue to operate and will be administered by an irl friend of mine (he doesn't use HF). He has access to all emails, databases, servers, etc.

For help, please contact us using the http://sellan.net/contact page.
