Apologies, maybe I should have been more specific. I will search database leaks for information that you give me for free.

I'll lookup a person on a database for you, just give me his social security number, routing number, username, password and mac address.

Pulled some good info from the username I sent. Thanks a lot OP!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

what?... use the rabbit hole technique... https://twitter.com/estudiante19581/media

jude@gmail.com is a fake email anyway it is a blanket and was used for mass spam since 2018 they mainly spam WordPress and Joomla sites using it...

I search databases. When I search "jude" or "jude@gmail.com" there are literally too many results to send back.

its because this isn't an email that is really going to be in any dumped DB's since its a spam email
