DavySnake - February 4, 2011, 7:41 pm

I think its my fault for being too stupid ! He sent me a PM and ask me if I needed some help with my RAT <https://hackforums.net/showthread.php?tid=1029679> So I added him on msn and he send me the "Fly Crypter New"290k LOL.. he said it was the new one and blabla but I didnt downloaded it. After a while we started TeamViewer and he start communicate on notepad on my computer. He said he will test vps so he drag a TEST(2) file on my desktop...curiosly, it was the same size as the other (290k). He just clicked on it and it was is RAT... i guess. So I had to restore from the boot options because I wasnt able to do it from my Windows options (no restore point.. yeah right...) Even Windows security center was hacked. I'm ok now !! Too stupid I was.... ?

Unfortunately, this can be expected, If the proper precautionary measures aren't followed.

You've learned your lesson, so time to move forward.

Should have killed the connection on teamviewer when you seen the size of the file.

The true hackers is that the dark side or not , have to comply with a etic for to do belong of the elite (hacker) otherwise they are of simple pirates.

This^ It's very hard to trust someone over the internet, for me it's impossible. I even have difficulties trusting IRL mates. Lol
