[contract=tid]Start Contract[/contract]
Zalures HTTP Web-Based SilentMiner is one of they best Miners on the market. There as desktop versions of miners...sure, but you are able to keep tabs on your clients and see how many clients you have at one given time, with Silent Miner you are able to deploy without the need of a desktop builder when you are away from your Computer. There is a built in lite version of the builder in the panel. XMR Mining is a big thing and so is keep track of your rigs. Come try out the New Silent Miner by Zalure Today. YOU WILL GET THE FILES FOR THE MINER WHEN BUYING LIFETIME, MONTHLY COST YOU WILL GET HOSTED BY ME

You get 2 BINS free then its $5 for a bin to be created.

Code UPDATE:
UPDATED TO HAVE PROXY AND GPU
FIXED SOME GLITCHS IN PANEL

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

LOL virustotal Not scanning on that.

Ill do nodis,

And it depends on the features that are enable and the stub that you want. from 5/26 to 22/26,

You will need it to be crypted

UPDATE you dont get the builder anymore. So no need for scan links.

How is it a cash grab? Everyone here either offers the builder or just the bin, for the lucky ones that have builder then awesome to them. But everything is in that bin so there is no need to have the builder. You crpyt it and spread it. No need to recreate it. You have a custom bin with a name in it, sure ill do it. You dont need see me coming over to your overly priced RAT setup and giving my 2 cents now do you ? No .

That's pretty funny that you say that.

In the web-based client, will I be able to see every computer that is running the miner (much like a bot where you can see all your connections)? Is there a way to update the miner (perhaps a refud) and then run the updated version on all current infections? Addiotnally, is the proxy build into the .exe miner build, or will we have to integrate our xmrrig-proxy? Thank you!

What happens if something happens to you or your server goes down? Will the miner still function? If not, is there a way to avoid this?

You can buy lifttime and you will receive the panel files. So you can host your self.

I would like to know this still! Mostly if there's a way to update current clients with a new FUD version of my miner whenever I need to.

hello,
i have my bulletproof webhosting & i want to host it on my webhost....
so technically, i don't need webhosting along with the miner....
do you sell it without webhosting?

& yes, i am interested in buying lifetime license....

No you didnt you have no patience,

Please read CONVO or PM

Sent files, will need the URL of the hosting you are using for the BIN to be created.

Hey mate, does this come with a builder? Or do you have to compile & send the bin manually?
EDIT - Never mind there is a pic of the builder in the original post lol

i have changed everything about this panel I have to make the updates on the thread but I do let everyone know about the changed when they message me, I used to let everyone have the builder. But I had some bad apples so its a bin now. You get some free bins.
