Thread: Habbo Scripting tutorial [NOOB FRIENDLY] [NOVOFATUM]

MaKKoG9 - *June 7, 2014, 8:55 am*

Novofatum Tutorial

Hello everyone on hackforums! This is my first tutorial, so tell me, if i've done anything wrong, thank you. ?

We will need:
Novofatum IV (Download Here)

A network connection

A habbo account.

Flash player

Furni (Optional)

Let's connect to Habbo ?

When you have succesfully installed Novofatum IV from Novoproject.net follow these easy steps:

1. Open the program and click Original.
2. Close all the dialogues
3. Go to habbo.com (Or your language, dk es fr etc.) and login.
4. Enter the hotel.
5. Connected

Let's get crazy, and run our first script ?

In this tutorial, i will only provide Server-side scripts, which is exploits visible for other users, and not only you. With client-side packets, or scripts, you will be able to give yourself mod tools, hotel alerts etc. (This is only visible for you, but could get handy, in the making of a scam video).

1. Look for the packet logger, in the program. (Im sorry, i got no screenies).
2. Open the packet logger, and walk around, while looking at it, so you can see, it actually is connected.

Now let's learn our first exploit. I call it "Sit repeat Sit repeatSit repeatSit repeat"

Enter a room, of your choice.
Use the habbo hotels "sit" function, and look for the packet in the packet logger. Should be under the packet looking a bit like "User sit", or something.

Now go to injection tools, and little j mode.
Use the old one, and put the whole packet, we just found in there (Ctrl + c // Ctrl + v).
Call it whatever you want, and put it to 1 ms (Milisecond)
Now click add, and walk around in the room!

That was it, thank you! ?

If you got more time, feel free to enjoy my Danish video, where i give myself Mod Tools.

Click here for the video

Great tutorial for the newbies.
But by looking at the video, it really looks like you have no idea about what you're doing at all.

xoxo Kopa.

I actually know what im doing there. I looked for a title packet, before i made the video. Im just going through it in the video.
cheers.

but good tutorial but most are to easy visit board.darkbox.nl for nice tools for ff game to win easy

MaKKoG9 - *June 16, 2014, 12:05 pm*
Yes visit darkbox.nl :-) Im MaKKo on there

MaKKoG9 - *November 26, 2014, 5:56 am*
THIS IS PATCHED EVERYONE. THERES NO WAY YOU CAN DO THAT ON HABBO ANYMORE

Musa1337 - *December 25, 2014, 12:39 pm*
I don't get the result of the hack. What happens when you do these things? Sorry for being a noob.

LMA0 - *December 25, 2014, 6:37 pm*
This is still possible with Tanji created by Arachis a.k.a. AgedPeanuts.

Deluxe_Shooter123 - *June 22, 2015, 4:31 pm*
It sucks that this got patched. It seemed like it was a great glitch!
