he gone lol asdasdasdasdasd

hyhyyhhrf3 - *June 9, 2014, 10:15 pm*
Damn, legit report, hopefully you can have this resolved

Edit: WOW, lol, looks like you'll need to pay a 50$ fee

-Distro - *June 9, 2014, 10:22 pm*
I bought from him yesterday for $112.

Damn, I hope mine doesn't turn out shitty or I'm going to be mad.

All I want is what I paid for :[

hyhyyhhrf3 - *June 9, 2014, 10:24 pm*
I was also in the, "sales" Skype group and witnessed naughty things

The aftermath...

Spoiler (Click to View)

(Jun 9, 2014 11:20 PM)Dex? Wrote: *[CITE]* I'm not saying with 100% that you did indeed scam him, but it looks like it.

It's just a shame whenever people do actually scam, they claim "Muh skype was jacked" then go on a massive scamming spree then everyone just blames on it these magical Skype jackers.
I got too much to lose here to scam people. I wouldn't waste my time investing in shit for HF to just get banned and leave everything to die.

Let me tell you what happened,

The guy came to me asking me for a setup so he paid me via BTC and I set it up for him. Then he started complaining that it wasn't hitting so I decided to stream my desktop hitting 2 people off and showing him that it indeed works. He did not listen and said it still doesn't work so decided to ask for a refund and I told my that he accepted the ToS when sending the payment and that all sales were final but I'll do an exception and give him $50 whenever I come back on the 15th. He then stood quiet, I went to bed and got woken up by multiple people telling me that I did a mass message and it wasn't in the normal format that I use.

Since usually all of my mass messages are in a professional format with the <username> tag.

Apparently, this one was a single line and that's why they contacted me. So as I try to enter my Skype password, it did not work and I cannot reset it due to me forgetting my email associated with it so I need to wait till I come back to contact Skype and sort this out.

You can believe what you want, I couldn't care less but make sure you believe the right person.

PS: Your stresser has been suspended for violating the ToS.

(Jun 9, 2014 11:23 PM)SMTP Server Wrote: [CITE] So, you act like you "run every booter on HF", but can't seem to stay anonymous or secure a skype?

Don't know why you act like this.
How do I act like anything? I fucking sell setups for the love of god. Do you see anywhere written stating 0x68 is the god of stressers?

You think you're smart? You fucking jacked my account you idiot.

You even pmed me stating "winter is coming" stating that with some treat towards me.

I've been AFK for the past hours and only got on just now since people messaged me stating my account got jacked.

All of this is just me being framed. I did not scam anyone nor sent anyone any of those messages.

I don't even know who the fuck Dildo man is?

Spoiler (Click to View)

I'll get to the bottom of this, you pricks think your smart to jack my Skype account like that and make me look like a bad guy? I've never had any issues with ANYONE on this forum.

I can actually confirm and prove he hasn't been responding on Skype for the past few hours.

He has been online the whole time but not responding. I just thought he was AFK so I kept messaging every 3 hours or so.

He only started responding to me now which goes to show that he hasn't been here the past while.

hyhyyhhrf4 - *June 9, 2014, 11:06 pm*

Did your hackforums account get hacked too then last week?

Dex? - *June 9, 2014, 11:08 pm*
>inb4 hacked skype

Oh wait, that excuse has already been used.

SMTP Server - *June 9, 2014, 11:09 pm*
Vouch! 0x68 is a skid that sets up booters and uses Vypors scripts.
Glad to see something happen to his HF ass.

Fuck people over? Coming from the guy who told group chats of hackforum members to -rep a member?

0x - - *June 9, 2014, 11:14 pm*
(Jun 9, 2014 11:12 PM)Dex? Wrote: *[CITE]* You do know someone can just resolve the Skype IP and figure out you're lying, right?
You do know there's programs out there to hide your IP from Skype Resolvers, right?

I resolved my own Skype and there's a Microsoft IP that popped up and that only happens when you have specially crafted tools against skype resolvers (That I do not use) since you can see my other IPs there as well.

I can't even login to Skype right now but someone is on it right now since I'm receiving PM Confirmations from people

(Jun 9, 2014 11:14 PM)Dildoman Wrote: *[CITE]* Fuck people over? Coming from the guy who told group chats of hackforum members to -rep a member?
No I did not what the fuck? The reason that guy got fucked up is because he posted some stupid post and the people I help did not appreciate it.

Look I ain't got shit to explain to you. You got your product, it's working fine and now you got someone to take over my Skype.

Go back to the Dark Web kid.

Sorry, I don't believe you.

174.93.229.117 and 65.94.255.138 are both Canadian IPs, which I believe you are indeed Canadian.

As you can see, the current IP showing was logged in before your actual IP.

I'm guessing this is one of your proxies/VPN/VPS.

If you notice,

First the fuck, who the fuck are you? Second of all, I don't even use VPNs because I don't care who has/got my IP.

Third of all, that IP there is from the actual Microsoft Skype Center whenever you cannot resolve an IP. That's what returns from the Skype Resolver when you're blocking resolvers.

Get your shit right before making your post.

I don't give a fuck anyone. Believe what the fuck you want to believe. Thanks for fucking ruining my shit just because you were not sastified. Enjoy my Skype, I already pmed most of my customers telling them to not deal with that Skype or to confirm via HF to see if it's me.

This is why kids, you do not deal with people from the Dark Web.

(Jun 9, 2014 11:51 PM)0x68 Wrote: [CITE] How am I stooping low? I fucking showed you proof that my vacation isn't fake.

You still haven't responded about the join.me session I had with him showing him it does hit, been 4 times now you keep ignoring that.

Anyway, have fun with my Skype, I'll just be making a new one and more securely as well. Needed a fresh cleaning anyway.

You showed proof of your vacation? You realize you can easily edit a web page right? Somehow you believe everyone is entitled to believe your bullshit vacation screenshot over WEEKS of Skype logs. Why didn't you claim your Skype was stolen weeks ago when you asked us to gang rep a user? How can you explain the excessive negative rep on the user that you asked us to rep abuse?

0x - - *June 9, 2014, 11:57 pm*

I never fucking said it was compromised weeks ago. I STATED at multiple occasions it was only jacked over an hour ago.

You can easily edit past messages, exactly what the jacker (aka you) could of done within seconds.

Also I ain't got shit to prove to you, you're just getting to a dead end and stating now that I edited a public service website. You're fucking sad kid, you know what's the saddest part? You got nothing to do with this.

I've already explained myself, i dont give a fuck what this community wants to believe because I know I'm telling the truth. So go on, keep going.

PS: Just found the jacker (metamorphikxx@gmail.com) not sure who that is but that was found as a secondary email. Thank god for hotmail logins

The thing is this isn't just about his skype being jacked. OP has purchased the product over a week ago from him and hasn't got satisfactory results. As a result, seller told OP he would refund $50 but only after 15th after his vacation hence the OP felt suspicious and opened the scam report.

Seller should just refund to OP and settle this instead of dragging it on and playing the TOS card imo.

Aceman - *June 10, 2014, 8:55 am*
He uses shared APIs for EVERYONE he sets a stresser up for. He then only gives a portion of the power he promises and rips you off. That's why I told my business partner not to get involved once I had spoken with 0x68.

do not, but I did realize why his Skype resolver is no longer working. He was leaching off BigDap's API for his Skype resolver and once found out he did not want to purchase another one. I'll post the logs from when I spoke to him with two others but since I have not gotten their permission to be involved in this topic I blocked out their names.

Talk of the Skype resolver.

We had bought APIs off him which were only hitting 100 Mbps so I was rather concerned we were getting ripped off. His terrible attitude which caused us to not to deal with him;

I've noticed in about 80% of disputes a few of these things happen, if not all.

Claim account is stolen

Hide behind vacation

Blatantly lie about small facts

Very seldomly will anyone take responsibility on Hackforums -- I assume this is because most HF users are children(this is the case in our situation) -- which results in little to no progress. I'm afraid

this will never be resolved solely because some kid wavered his vacation pass; people like him shouldn't be allowed back on from vacation.

I read through the entire thread and addressed my concerns about him to others involved, glad we didn't end up purchasing from him. I'm positive his Skype was not hacked and it was proven on this thread. You're right, he's blatantly lied on this thread and owes the money since he did not do as advertised. He invites them to join.me but doesn't mention the fact that an attack sent from the website cannot hit somebody off. If 0x68 can hit somebody off but the website cannot it means something is fishy or it was not set up properly.

It's really that simple, if an attack launched via the website cannot reach the power which he promised then he has been falsely advertising / lying.

I'm positive his Skype was not hacked and it was proven on this thread. You're right, he's blatantly lied on this thread and owes the money since he did not do as advertised. He invites them to join.me but doesn't mention the fact that an attack sent from the website cannot hit somebody off. If 0x68 can hit somebody off but the website cannot it means something is fishy or it was not set up properly.

It's really that simple, if an attack launched via the website cannot reach the power which he promised then he has been falsely advertising / lying.

Oh, I love how he made this https://hackforums.net/showthread.php?tid=4273056

This is the gem of it all. 0x68 tried to explain to me how my friends residential 10 mbps Comcast connection was filtering the attacks. 0x68 also tries to bullshit me saying the attack command takes times, well, it does, but not fucking 5 minutes. 0x68 finds a way to blame everything and everyone besides his API's.

(Jun 10, 2014 09:44 AM)Dominick G. Wrote: *[CITE]* I've noticed in about 80% of disputes a few of these things happen, if not all.

Claim account is stolen

Hide behind vacation

Blatantly lie about small facts

Very seldomly will anyone take responsibility on Hackforums -- I assume this is because most HF users are children(this is the case in our situation) -- which results in little to no progress. I'm afraid this will never be resolved solely because some kid wavered his vacation pass; people like him shouldn't be allowed back on from vacation.
Exactly. It's complete bullshit, especially when there is quite clear proof that he was on his Skype account and that it does sign you out when you change the password.

He's lying, like many other HF scammers, and the community will probably still take his side.

?Chief Keef. - *June 10, 2014, 10:51 am*
Hope 0x68 goes on vacation forever. Stupid scammer. Legit scam report.

Ricky? - *June 10, 2014, 10:53 am*
This guy is legit, I dont know why this happened, but he is legit 100% and worked with me and it works for me atleast.

-Distro - *June 10, 2014, 1:58 pm*

About the skype being jacked, that is true but I still see your point that he did scam you. And I wouldn't say I agree with you as you don't have any proof really of it not being satisfactory or exactly what you were supposed to get but I hope this gets figured out.

Dankrupt - *June 10, 2014, 6:47 pm*
I can confirm that before this scam report 0x68 transferred all of his PayPal and BTC into his bank account for his vacation.

We talk on Skype almost every day and I did notice something a little bit off which is when he added me on a different Skype saying his was hacked.

He leaves for vacation tomorrow and I trust that when he's back everything will be resolved. He's showing no signs of a scammer and is really hoping this can all be resolved. I've lent 0x68 $150 in the past and he paid back every cent of it.

He's worried this is going to end up ruining his reputation on HF which I hope it doesn't. He is a very trustworthy user and I honestly doubt you are going to end up without a stresser or your money back. Good luck in all of this!

Yeayeah I know that.

I mean, if the user actually did get what he paid for then he can't get a refund.

The point is that there's no proof he didnt give him what he paid for, there is only proof is an issue in which 0x68 said he fixed and they never complained since to him until they opened this report.

That's a good point, there's no proof to what you're saying OP. He's had 10+ satisfied customers I don't see why yours would go this wrong. I'm not saying he didn't do it, but all I see is arguing via Skype/PM.

In all honesty without the OP posting proof or a Dstat of it not being what its supposed to be then he didn't really get scammed.

Obviously they had an argument and seems kinda fishy with the Skype jacking right when OP was mad at 0x68, but that's got nothing to do with the report. At the end of the day there's no proof of 0x68 scamming, and until OP shows real proof I won't be making up my mind on whether he was scammed or not and I don't think others should jump to conclusions that 0x68 is a scammer so quickly.

No, because scamming is still against the rules.

But if you put no refunds in your TOS and you gave the person what they paid for without scamming them, and they asked for a refund just because they wanted one you will have a reason to say no and you did warn them that they would not get a refund if they asked.

You are missing the whole point, up until this thread seller agreed to give OP a $50 refund. After making this thread seller tells OP he broke his TOS.

If it's against his TOS, why did he offer a refund in the first place? Seller is not being straight forward

I believe 0x68 meant that he broke a different part of the TOS and that's why he will not be getting a refund anymore.

I believe that once 0x68 is back he might be up to giving the $50 refund but at the end of the day its up to 0x68.

If he doesn't want to give a $50 refund he doesn't have to. Its right in the TOS.

Also, its kinda like if I say I'm going to give you $50 for no reason at all and then decide not to? Does that make me a scammer? No. It may make me a liar or make you dislike me but at the end of the day I did not scam you.

1) no, there isn't proof. The last IPs shows any IPs on the account before.

2) Here is the proof.

Spoiler (Click to View)
[img]http://cdn.imghack.se/images/0b5fdf440606861af73bf148af5f760f.png[/img]

Not going to post links as I'm not sure if posting doxes is against the rules but go ahead and fox that email. By the way, its a different PayPal from the one I used to pay 0x68.

And also, the PayPal is used by someone who has Skype to help you dox ;)

I'm sure if a staff member checked HF for that email, it would be a user. And I bet that would show who it is.

I also wanted to point out that the reason I said I had the $80 is because I know that most people don't just turn down money. And of course the person responds with their PayPal. Not surprised.

Go for it. ;)

The Skype resolver showed the last IP logged into the account. This IP was also on the account before 0x68 changes his IP and his IP came after it. Proves that he went on the proxy then went back on his home connection.

He also said the password was changed, but was not logged out of Skype.
This is false.
If you're logged in, change your password, you get logged out within 10 seconds.

He also said the password was changed, but was not logged out of Skype.
This is false.
If you're logged in, change your password, you get logged out within 10 seconds.
Great points, Dex, can't forget about those gems.

Yeah it seems like a lot of people used to, like they used to trust Alcroz, but as you can see past the scam report he is lieing and much more. From the Rep abuse to the lie about not being logged off Skype, which has been proved, you can even try it.

-Distro - *June 10, 2014, 9:23 pm*
Sorry it took forever to post the picture I'm on my phone and its really hard.

And just to be clear guys!

I am not defending 0x68 in anyway, nor am I saying that OP is right and deserves a refund.

All I am saying is that there is not enough proof supplied to be convincing and that we shouldn't jump to conclusions of 0x68 being a scammer when we still don't have sufficient proof of him scamming in any way.

It does seem fishy, I will agree to that but I personally see both points of views and I would say that neither of you are right.

The only really fishy part is the rep abusing part, in all honesty. Which I don't agree with. I think rep abuse is terrible.

Well shit :/

The only problem I'm having with all of this is right after this report was filed he complained to me over his new Skype account saying someone is trying to frame him and he didn't scam anyone.

I see 2 explanations for him saying this to me:
1. He wanted me to be on his side and unknowingly help him scam.
or
2. He honestly had no idea his setup wasn't working correctly and this is a misunderstanding.

I really hope when he's back he'll prove it was #2.

(Jun 10, 2014 09:30 PM)Valderino Wrote: [CITE] Interested to see how this turns out.

I've exchanged hundreds in the past week with 0x68, and lent him $50 recently (before the skype jack) so I trust him enough. The only issue is that I have only been exchanging with him, not purchasing stresser power / API, etc. That said, I don't see why he wouldn't be able to refund you when he gets back OP, if that's the only solution.
Valderino contacted me via PM with the PayPal who's he's been sending money to that 0x68 said was his.

It is a different email from the one I had to pay for the service.

Kinda fishy.

Just goes to add more to the table that something is going on here, just not safe to say what is going on yet. I wouldn't say we jump to conclusions. Let's just try to figure it out.

(Jun 10, 2014 09:36 PM)Dildoman Wrote: [CITE] Ok whats your conclusion then, what do you think?
I'd say that you're both sketchy users in all honest and Im not sure which one to trust but you both have evidence supporting each others opinions and I wouldn't be able to choose a side at this point as there's not enough convincing evidence.

In all honesty, this scam report doesn't even have enough proof to say he scammed you in any way. That's why I'm not choosing a side.

I'm not saying he didn't scam you, for all we know he might have. But there isnt enough proof to say he did scam you, yet at the same time there isn't enough proof to say he didn't scam you.

The thing is that everyone is innocent until proven guilty.

That's how the world works.

He is innocent until you provide convincing evidence to show that he is a scammer.

He doesn't need to supply proof that he didn't scam you, YOU are the one making the report. If you don't have sufficient proof then that's it.

I'm not sure if you're just really young and never been in court or maybe you're just not able to understand it but that's how things work man.

He anticipated this thread before the deal even went down?

That excuse wouldn't of worked anyway, he took the vacation ban after this thread was created. He knows of this dispute but doesn't have the time to deal with it at the moment.

All of this arguing is pointless until he comes back from vacation. If he comes back and makes BS excuses, we know that this is in fact a setup.

Errors - *June 13, 2014, 10:59 pm*
I'd hate to call Ox68 a scammer. But I asked him about the "jacked skype" and etc.But that's what this all points to...
Talking on skype- http://prntscr.com/3smyhg . Once I received the message about the users "Skype being jacked" I thought about it, and was planning on hitting the user until I noticed he was connected to the same IP range. Asked him about my api's I had purchased(4 in total not even hitting at 1gpbs) and he tried to show me that it was hitting via teamspeak and told me repeatedly that the ip's I tried hitting were "filtered". I then took the time to ATTEMPT to hit myself, and guess what, not even a little lag. His response to me was that I wasn't hitting for long enough and linked me this (https://hackforums.net/showthread.php?tid=4273056). Now I myself have ran several stressers using APIs and I thought to myself this seemed pretty off eventhough to a certain extent he is correct. I then decided I have a spare modem that is still 100% default and hit it about 4 times at different intervals all surpassing 10 minutes. No lag, disconnection, anything. I hope when 0x68 comes back from his "vacation" he fixes this with everybody. To anybody that has suffered from this... Good luck!

I would love to see it my friend, I wonder if you will be giving up on your hacked skype game

0x - - *June 16, 2014, 12:44 pm*
Sorry for the late reply, I had stuff to do last night so I wasn't on in the past 15 hours.

So you opened a dispute here stating your stresser (APIs) were not working. I've showed you multiple times that it indeed works and I think it's time for HackForums to see
that I'm right and they do work.

Here's a quick video of YOUR API that you were SOLD working just fine.

[Video: https://www.youtube.com/watch?v=0lk684-RtoQ&feature=youtu.be]

As you can see, it hits just fine and as it should. So I sold you a working product that indeed still works.

Due to you opening a dispute, your APIs has been suspended and your whole website as well.

Due to the evidence above showing it works, I will NOT be giving you a refund.

This will be my last reply on this thread due to the evidence I provided being pretty clear. I got nothing else to prove myself about and I don't care what you have to say. With that being said, have a great day.

So you opened a dispute here stating your stresser (APIs) were not working. I've showed you multiple times that it indeed works and I think it's time for HackForums to see
that I'm right and they do work.

Here's a quick video of YOUR API that you were SOLD working just fine.

[Video: https://www.youtube.com/watch?v=0lk684-RtoQ&feature=youtu.be]

As you can see, it hits just fine and as it should. So I sold you a working product that indeed still works.

Due to you opening a dispute, your APIs has been suspended and your whole website as well.

Due to the evidence above showing it works, I will NOT be giving you a refund.

This will be my last reply on this thread due to the evidence I provided being pretty clear. I got nothing else to prove myself about and I don't care what you have to say. With that being said, have a great day.The API works, so it must be something wrong on how you configured it on your stresser.

It's not how it was configured on the stresser, stop being a dick sucker.

I configured it perfectly, it was working for a few hours, then bam downtime.

It was up 25% of the time.

Why is it that in EVERY demonstration, literally you always DDOS the same "person", is done on "Winterfield1"?

After researching "Winterfield1" I found he's on a 3 Mbps residential connection line; are you really trying to prove your API's are working as promised by dropping a 3 Mbps line when you're guaranteeing 20 Gbps TN? Like. Really?

Things really aren't adding up, seriously. Why does this Winterfield1 folk always sit in you teamspeak server after you've ddosed him 10+ times? This video proves absolutely nothing whatsoever. For all we know the guy could have accidentally ripped his router out of the wall and he

disconnected -- please show us a LIVE DSTAT of your API's.

It is no surprise that this man is a neg abuser and scammer.

In this post, there was overwhelming evidence that he attempted to scam, therefore i supported OP. He saw i was normal member and unable to retaliate and neg abused me for nothing. When all i did was state facts and told him im siding with OP as he was in the wrong.

https://hackforums.net/showthread.php?tid=4322269&page=3&highlight=1125619

(Jul 17, 2014 08:34 PM)Dankrupt Wrote: [CITE] He did not rep abuse you in any way, what are you going to say he did? If you're talking about what he did to others, let them deal with it.
I checked your reps, and it shows you have dealt with that man 0x68 before making all your comments bias. There is a conflict of interest because you are his friend

He did neg abuse me for no reason, I merely stated in another report, that theres evidence that he got caught, and he negged me because he saw that i was a normal member (Cant fight back).

Furthermore, even if you ignore my claims (true claims) just go to the front page of this thread, and you will show that he neg abuse/rep abuse OP.

Its a pattern, 0x68 has been abusing his power as a UB3R member in this community for far too long.

Like i have said before, this community is too nice to LQ members/Scam/Rep Abusers. That is why 0x68 is sitll not punished, and i am still seeing people dealing with him.

Its unfortunate.

Dankrupt - *July 17, 2014, 9:45 pm*

I used to deal with him quite a bit and he was a good friend until he did this stupid shit. I've since blocked all communication with him.

You should check the definition of reputation abuse. He simply gave you a negative rep, although it may of been unnecessary it wasn't rep abuse.

Thomas Jefferson - *July 17, 2014, 10:14 pm*

(Jul 24, 2014 06:14 AM)Dominick G. Wrote: [CITE] 0x68 sure is a funny guy. When will this be resolved?

Due to not enough repercussions... 0x68 is just not going to resolve or refund OP because theres no pressure too.

Hes just going to continue dealing through neg abuse reps and various LQ activity....

Hopsin - *August 26, 2014, 5:02 pm*

(Jun 9, 2014 10:57 PM)0x68 Wrote: [CITE] I got too much to lose here to scam people. I wouldn't waste my time investing in shit for HF to just get banned and leave everything to die.

Let me tell you what happened,

The guy came to me asking me for a setup so he paid me via BTC and I set it up for him. Then he started complaining that it wasn't hitting so I decided to stream my desktop hitting 2 people off and showing him that it indeed works. He did not listen and said it still doesn't work so decided to ask for a refund and I told my that he accepted the ToS when sending the payment and that all sales were final but I'll do an exception and give him $50 whenever I come back on the 15th. He then stood quiet, I went to bed and got woken up by multiple people telling me that I did a mass message and it wasn't in the normal format that I use.

Since usually all of my mass messages are in a professional format with the <username> tag. Apparently, this one was a single line and that's why they contacted me. So as I try to enter my Skype password, it did not work and I cannot reset it due to me forgetting my email associated with it so I need to wait till I come back to contact Skype and sort this out.

You can believe what you want, I couldn't care less but make sure you believe the right person.

PS: Your stresser has been suspended for violating the ToS.

How do I act like anything? I fucking sell setups for the love of god. Do you see anywhere written stating 0x68 is the god of stressers?

You think you're smart? You fucking jacked my account you idiot.

You even pmed me stating "winter is coming" stating that with some treat towards me.

I've been AFK for the past hours and only got on just now since people messaged me stating my account got jacked.

All of this is just me being framed. I did not scam anyone nor sent anyone any of those messages.

I don't even know who the fuck Dildo man is?

Spoiler (Click to View)

I'll get to the bottom of this, you pricks think your smart to jack my Skype account like that and make me look like a bad guy? I've never had any issues with ANYONE on this forum.

https://hackforums.net/showthread.php?tid=4277340There is no reason to flame him, if he offended
