Thread: [iCrypt vs Ownz Crypter](#)

eastanbool - February 6, 2011, 1:07 pm

Hello HF im thinking about buying one of these Crypter.

Im really confused cauz both have good things and bad things

iCrypt:

- No dependencies
- +stealer
- it have sometimes det.
- maybe it takes to much time to get new stubs.
- cheaper than Ownz Crypter

Ownz Crypter:

- needs .net framework
- USG-very nice
- expensive

So what is in your Opinion better..dont call me other Crypter

joshboii1992 - February 7, 2011, 2:45 pm

-xGhost - February 7, 2011, 2:48 pm

bredsticks - February 7, 2011, 2:50 pm

It sounds like you want iCrypt from the way you describe it.. go with your first instinct man. I used the free ownz crypter and it stayed fud for quite a while but then again it was free, so it wasn't going to last forever. No .net dependencies helps but a lot of vics have .net. Good Luck

I would go with iCrypt from what you're saying.
