Thread: Easy Challenge - Move And Resize Borderless Form

Only3 - *August 11, 2014, 4:24 am*
i saw many threads asking for it

let see how simple u can do it

start point

^^ that simple

?

RKYDA - *August 11, 2014, 4:27 am*
An example : http://pastebin.com/hvVuqKmN

Only3 - *August 11, 2014, 4:31 am*
RKYDA u can do it much simple
tip - google the challenge

LordCoder - *August 11, 2014, 7:10 am*
Are you joking or laughing at our faces?

Only3 - *August 11, 2014, 7:15 am*

? i add for u start point let see u laughing ?

LordCoder - *August 11, 2014, 7:30 am*
A way to resize a borderless form without code:
1. Remove Me.Text (Put "").
2. Change Me.ControlBox = False
3. Change Me.FormBorderStyle = Sizable

Done. Move code is easy to search on Google:
Code Private dragging As Boolean = False
Private dragCursorPoint As Point
Private dragFormPoint As Point

```
Private Sub FormMain_MouseDown(sender As Object, e As MouseEventArgs)
    dragging = True
    dragCursorPoint = Cursor.Position
    dragFormPoint = Me.Location
End Sub

Private Sub FormMain_MouseMove(sender As Object, e As MouseEventArgs)
```

```
    If dragging Then
        Dim dif As Point = Point.Subtract(Cursor.Position, New Size(dragCursorPoint))
        Me.Location = Point.Add(dragFormPoint, New Size(dif))
    End If
End Sub

Private Sub FormMain_MouseUp(sender As Object, e As MouseEventArgs)
    dragging = False
End Sub
```

Only3 - *August 11, 2014, 7:43 am*

let me reply with ur own reply

(Aug 11, 2014 07:10 AM)LordCoder Wrote: [CITE] Are you joking or laughing at our faces?
ppl have hard time to understand simple things > YOU
also ur move code is longer then my move and resize code

LordCoder - *August 11, 2014, 10:00 am*

Nobody cares if it's longer or not, I think you don't understand. This thread is pointless and useless. Oh and btw:
Code blahblahshit = Falsealso needs to be declared so your code is longer.

BubbleDoo - *August 11, 2014, 6:37 pm*

How is it useless, ofcourse he could've just posted his way, but I'm kinda sure that people would've said 'Everyone knows this..' and things like that, while when he asks for it, nobody knows it. Anyway, you don't have to define something in order to set it as false?

Corios - *August 11, 2014, 6:50 pm*

I really really wish we had a moderator here that would just mute Only3. He's so useless to this section -.-

SIM-1456245 - *August 11, 2014, 7:16 pm*

Come on man, stop it, will ya ? Don't you understand that this is NOT a challenge, you can find this on any beginner YouTube tutorial, any. If you are going to be doing challenges, do something a bit harder.

LordCoder - *August 12, 2014, 12:43 am*

(Aug 11, 2014 06:37 PM)BubbleDoo Wrote: [CITE] How is it useless, ofcourse he could've just posted his way, but I'm kinda sure that people would've said 'Everyone knows this..' and things like that, while when he asks for it, nobody knows it.3 answers were provided, we cannot guess what's his code.

Then what are you setting as False? The air? Think a bit before posting.

Why don't you do a hard challenge? Afraid you can do it your self?

Only3 - *August 12, 2014, 4:08 am*
(Aug 12, 2014 04:00 AM)Cornflower Blue Wrote: [CITE] Why don't you do a hard challenge? Afraid you can do it your self?
well no1 handle meidum and u want hard even simple u cant handle ?

Cornflower Blue ???-?— - *August 12, 2014, 4:09 am*

Make the hardest white hat challenge you can.

Only3 - *August 12, 2014, 4:15 am*
first pass this simple challenge then i will give meidum that if u pass it i will leave the vb section ?

Only3 - *August 12, 2014, 4:16 am*
DELETE DELETE DELETE DELETE DELETE DELETE DELETE DELETE DELETE DELETE

Only3 - *August 12, 2014, 4:17 am*
DELETE DELETE DELETE DELETE DELETE DELETE DELETE DELETE DELETE DELETE

Cornflower Blue ???-?— - *August 12, 2014, 4:32 am*

I can't be bothered with your simple challenge threads, I have work to do, if is was something that I would have to think about, then I would have a go, otherwise what is the point making something that any body can do.

Take my example before, make a challenge where you have to display a GIF image in a console with color. That is a good hard challenge.

Only3 - *August 12, 2014, 5:05 am*
yes its simple i say it in the title but still no1 do it i even when i gave start point
the challenge is not to c&p the public codes but to use ur brain to make it much simple
challenge should be done just with net code and not using any 3d party {lib, dll, app}

$lick - *August 12, 2014, 5:09 am*
Thread has glitched, Commenting to fix it.

Cornflower Blue ???-?— - *August 12, 2014, 5:12 am*

Listen, just make a harder challenge, atleast then it's a challenge.

SaketSaket - *August 12, 2014, 5:24 am*

My attempt ;) You can use this code with option strict on too ;) ...

PHP Code

```
<?php
Enum MouseState As Byte
   None = 0
   Over = 1
   Down = 2
End Enum

   Private _mousepos As Point = New Point(0, 0)
   Private _drag As Boolean = False

Protected Overrides Sub OnMouseDown(ByVal e As MouseEventArgs)
     MyBase.OnMouseDown(e)
     If e.Button = Windows.Forms.MouseButtons.Left And New Rectangle(0, 0, Width - 1, 30).
Contains(e.Location) Then
     _drag = True : _mousepos = e.Location
     End If
   End Sub

   Protected Overrides Sub OnMouseUp(ByVal e As MouseEventArgs)
     MyBase.OnMouseUp(e)
     _drag = False
   End Sub

   Protected Overrides Sub OnMouseMove(ByVal e As MouseEventArgs)
     MyBase.OnMouseMove(e)
     If _drag Then
     Parent.Location = New Point(MousePosition.X - _mousepos.X, MousePosition.Y - _mousepos.Y
)
     End If
   End Sub
```

Regards
Saket

Edit : changed rectangle values.... as it was taken from my last theme...

Only3 - *August 12, 2014, 5:42 am*

SaketSaket where is the resize code the move code is simple

SaketSaket - *August 12, 2014, 6:45 am*

(Aug 12, 2014 05:42 AM)Only3 Wrote: [CITE] SaketSaket where is the resize code the move code is simple

ohh... only provided code for move... will have to code for my theme first then i will post here... ;)

Only3 - *August 12, 2014, 6:48 am*

good luck try to find better way for move too

LordCoder - *August 12, 2014, 6:50 am*

Why reinvent the wheel when it's already done? It's useless to make a code that's already on Google. Point another challenge, there are thousands that aren't on Google.

He only does challenges where the answer can be found on Google, because Only3 can't code, he is just a copy/paste skid.

Please learn English and then we talk because I don't understand you. I'm not the only who says that.

That's the same class as I linked BUT instead of the class it's a project.
