Thread: Adult site video adder? [Prize for best solution $]

???? - *September 11, 2014, 10:36 am*

Hello!

I recently bought an adult site (runs on wordpress) from a member here but I have a minor problem. I do not know how to bulk add videos to the site. I need to manually add every video and I would need to like a hundred videos per day which would be a pain in the ass to do manually.

So what I need is an automatic video adder/bulk video adder. I don't mind throwing a few bucks into it but if it costs a shitload, then no thanks. Anyone have a suggestions?

Also the prize for the best solution depends on few things, though the minimum I'll give would be 10$.

You can always use the embed codes, And add videos that way :p
Goodluck btw.

As I said I need to manually add (embed) the videos now. I need a better way.

There's a free service called http://easyxsites.com/ which allows you to set up a tube and easily important videos.
Spoiler (Click to View)

As for WordPress I think tubeace is what you're looking for.
http://www.tubeace.com/

However it costs money. Soo. You might just be better off moving your domain to easyxites.com and dumping the wordpress blog.

Or you can manually update the wordpress blog.

Hmm any other suggestions. Or do you have any vouches for the tubeace? I would not like to pay 80$ for it if I wasn't sure it worked :D

Here's a thread on it:

By the way I don't mean to spam or anything, but if you're interested in promoting your website I recently launched an adult ad network called http://adfling.com/
