Thread: Exploit to the biggest radio company in Romania

Pitimauf - *September 27, 2014, 5:05 am*

The Radio is called Kiss FM Romania

Is the biggest radio ever and they have an exploit to their server
They didn`t hidde the login panel to their server as it was pretty easy to find

http://128.140.230.3:80

They also don`t have captcha for login error so all I have to do now is to deface their website using a bruteforcer to login as admin :D ?

adriancs35 - *September 27, 2014, 10:28 am*

For the biggest Radio Company here , I strongly belive they got a 200 character password, which nobody gonna try hacking, or maybe that login it's just for mocking people, some devs. wanting to play with hackers.
Just my thoughts...

FantaŠec - *September 27, 2014, 10:32 am*

@adrian, doubt it. Would probably be in within a day or two knowing typical large companies.

Hooded Robin - *September 27, 2014, 9:05 pm*

lol, you found admin panel - must mean they are super vulnerable.....

3 days, maybe someone already hacked it and is incognito or nobody hacked it...
