Hacking is illegal, so taking the risk is entirely up to you, I take no responsibility.
[img]http://i5.minus.com/iv4cgSsdCDhaN.png[/img]
I'm going to contribute some of my time to train some of you on how to easily hack vulnerable WordPress websites. Not to many people know this method publicly THAT'S why I'm only going to train a selected number of you. To better read you, here are my requirements;

Posts: 100+
Reputation: 50+
Awards: (Optional)
Warning Level: 0%

You do not need ANY experience in website hacking to do this, just follow my step-by-step instructions online and you will be well on your way to hacking thousands of vulnerable WordPress websites with ease ?

This is a learning experience for the Ethical Pen-Tester so if you just want to deface websites this is not for you.

If you are interested and meet the requirements please leave a comment and I will be in touch with you via PM. I'm only selecting members that contribute to HF so if you do not get a PM from me please don't take it personal. ?

Its not fair. You teach those who have very nice rep.
N00bs have not like that much rep.And members who is very old have much high quality rep.
Why you not write this thread in Private of this forum where only VIP Member can access because they all have high quality rep and posts
You expert person always neglect n00bs.

Ensigma - *November 10, 2014, 10:08 am*
I would love to try this course Please!

Oak. - *November 10, 2014, 12:19 pm*
I don't have the amount of rep you'd like but maybe you'll still give it to me, thanks.

cr0n1c - *November 17, 2014, 5:41 pm*
Guys, the easiest way to break into a Wordpress site is to gain access to the wp-admin. Most that I have tried to brute force have worked. It just takes time. Once you have broken creds, the next step is to push a c99shell or some other php backdoor up there. I find that putting them in the wp-admin page guarantees execute perm is set. Once you get active through the php backdoor, then drop a better payload (meterpreter, or similiar) and now you have a shell, (windows you will most likely be administrator). This will most likely be your way in on a targeted engagement.

benison321 - *November 18, 2014, 10:15 am*
Teach me mate plz. I'm really looking for such thing. I hope I will get PM from you. Thanks in advance

i want to see what you have there :) Thank you in advance

Tricks7er - *November 21, 2014, 9:03 pm*
Not enough rep or posts but I specialize in control management system hacking, prob will do web app vuln finding for a job after I become a pro.. But anyway, is this course just a wordpress vulnerability or vuln plugin scanner then after you find the vuln the correct exploit is provided? Like you said, no experience is needed.

hacker2learn - *December 1, 2014, 7:17 am*
Man, i'm so unlucky that i started today.
I'm going to apply to be a forum/game mod in a few games that i'm playing. And i want to learn how to prevent hacking by learning it, so i can improve the security of the games. This would be a really great step to know the hacking better.
unfortunately i don't have the requirments you want me to have. But i will try to learn as much as i can from the internet, and hope it will be as effective as your tutorial.

Have fun everyone who can use the tutorials :)

•Neon - *December 2, 2014, 7:04 pm*

I turned down l33t twice and contributed a lot. I should get a sneak preview to see if its worth even asking for.
Rep should explain who I am to the community

Here is one of my biggest contributions, it was made for the python section.

Fallenour - *February 19, 2015, 11:46 am*
I'm definitely interested in this. Will I need to build a wordpress site in order to successfully complete this class? I have resources available as well to build environments for all the attending class members if need be.

h?ck?r - *February 19, 2015, 3:14 pm*
I would love to learn because when I graduate high school I want to become a security analyst. I don't have the requirements of L33T or UB3R, but I really would like to learn. I wouldn't leak this, I just want to learn so that I can become better. I am stuck at where I am as a 'hacker'. Please consider teaching me because I would love to learn and am eager to do so. Thanks for offering this,
-greyhatphantom

You didn't fully meet all of the requirements to get this, sorry. You need L33T or UB3R as a rank, more posts and more reputation.
