Thread: [-*****?\[Xerotic Program\] PassWordSafe Encrypt Your passwords Now! \[En/Decrypt/PassGen\]?*****-](#)

Xerotic - February 9, 2011, 10:30 am

[img]http://i.min.us/iesyuM.png[/img]

Hey guys, in light of recent events i have decided to create a line of programs. The descriptions are as follows:

PassGen - Choose a number, a random password will be made with that many digits (from uppercase and lowercase letters [a-z A-Z] and numbers 0-9)

Encrypt - You input the password and a 'salt'. Neither is stored on the computer, it is up to you to copy them down.

Decrypt - You input the 'encrypted' password and the 'salt' that was used previously. If all info is correct, the original password is displayed.

ScreenShots:

[img]http://i.min.us/iexqTa.PNG[/img]

[img]http://i.min.us/iespKk.PNG[/img]

[img]http://i.min.us/iextbi.PNG[/img]

Important

What you need to do:

Store the encrypted password somewhere safe

Memorize your 'salt'. I would advice to NOT store this somewhere. If anything, write it down on a safe piece of paper and keep with your important documents

Nothing is stored on your computer. NOTHING. The encrypted password, the salt, none of it. You have to remember it or write it down.

This is only another precaution against account theft, I am not sure how easy it would be to break it. Enjoy.

Also, if this becomes a hit, I will add extra protection. Anyway, it is safer than storing your passwords open on your computer.

These programs were coded in Python

Download Link

Use this if you do NOT have Python

A *.rar archive

<http://www.mediafire.com/?db1973adyhg7teq>

The file is large due to it being coded in Python. Sorry bout that.

Use this if you HAVE Python

A *.zip file

<http://www.mediafire.com/?kctd6rv447ujzm7>

Side Note

In addition to these programs, I also suggest this:

<https://hackforums.net/showthread.php?tid=750973>

You can hide your folders/text files with passwords. Enjoy guys <3

Hope you guys use safety with passwords. ?

Calvin. - February 9, 2011, 10:35 am

Off thread topic ; I downloaded python and can't really figure out how to use
On topic ; Looks like a good program.

I am going to be posting the Python files (*.pyc file) for those with Python. The file sizes will be only a few KB I believe with that.

It encrypts your passwords... -.-

Xerotic - February 9, 2011, 10:40 am

Thanks for the virus scan, will add to OP.

Also, added download links if you have Python.

Thanks for the feedback! ^_^

A little bit safer than saving raw passwords.
