Thread: [w0rmy w0rm \[Detected\]](#)

Hazurd - February 10, 2011, 11:43 am

Hello, while browsing through the forums I found a couple of links to w0rmy w0rm but they were either back doored or uploaded via shit cash. Since I know what a great worm this is, I just decided to share since I have it!

Note: I did not make this, nor do I take credit for this. I forgot where I actually downloaded it but it has been working for me.

Wait so this is a link, so I can set up my own worm? Or is it an actual worm that will infect me (I think I know the answer, just making sure)... can I please have it?

Lmao yeah I posted a thread advertising that I was infecting people with a worm and everyone is posting wanting to be infected ^-^. Lol, kidding. Yes it builds a worm for you.

Hey I'm going to put the link back up, I've gave everyone that has asked for it the link. Just a little to busy to pm everyone. Please keep commenting if you download it, though.

Don't worry, we were all there at one point! What w0rmy w0rm does is auto spreads. You install it on your victim and it basically infects their files and p2p programs/ spams chats and stuff so any interaction with anyone will result in them being given the download link too. It puts the file into zips/rars so that if they upload one, your file will be in it without them even knowing!

Yes, I agree. I didn't make this but since it's so hard to find on these forums I decided to post it for members who's lives haven't been touched by w0rmy w0rm haha.
