From the picture so far, I think this Logger needs more update and redesign...

The design has nothing to do with functionality of the program.

vouch for cyprh user is hq and trusted

W00F - *March 13, 2015, 4:07 pm*

How detected is it? Just curious

Galaxy Logger is priced around the same with more "recovery" features however apparently FTP logging isn't working at this current moment. Steam and BTC wallet recovery are pretty attractive features.

ZeroLogger looks pretty stable, fresh and supported. Glws

I need a decent net crypter.
