BotMarket - *February 20, 2015, 10:06 pm*

Rules to purchase:

1. You may NOT be in anyway talking/affiliated/ even vouched for socialmediasupplier/socialstamp. (i will fully review your account before a sale will be made)

2. Fully understand the product.

3. You must download my backpage bot
https://hackforums.net/showthread.php?tid=4684245
OR download my private proxy browse
https://hackforums.net/showthread.php?tid=4692958

(Why you may ask because i want to make sure my software runs on your PC just spent about 2 hours trying to find out why one of my bots would not work on a fellow HF members pc)

If you pass all the requirements PM me before purchasing.

Sorry guys this is how i'm changing all my sales on here not dealing with all the team of scammers and risking my paypal or reputation on here.

Failing to follow my instruction will result in no support/updates ect.

Instant Download 50% OFF Hackforums Special $5

Do NOT think this software will:
Make 10000 accounts in 5 mins, it depends on your proxies speed
This software will NOT run SUPER FAST with slow proxies.

The $11.25 version has more features. It has a auto re-tweeter and a auto-random follower

User wanted the email and password in a combo list. I told him the software uses 2 different txt files one for passwords and one for emails.

He then demanded a refund. I tried to work with him and offered to attempt to mod the software to use one txt file in the format of email:passwords

Then he started making threats of chargebacks and DDOS'in me

Ignore my previous posts on this thread. Here we go with my full breakdown of this bot. It's total

GARBAGE. It took me an hour to try and get it working, on top of that the developer was sending me new versions every two seconds. Finally, it was working, but then it kept giving a shitty error. He then said it was due to my crappy public proxies...When I was using fast private proxies mixed with some HMA Premium proxies.

Total rating (1 out of 10): 1

Reasons; Doesn't work!

I asked for a refund, but he stated his TOS of the thread. That's fair enough, right? Well, not really when his thread is completely invalid. This shitty bot does NOT create Twitter accounts mate. Stop selling this.

Good luck with sales now.

Ok so this guy is a total dumb ass he thinks loading crap slow public proxies into a account creator bot will run fast? umm no the bot can only run fast if the internet connection is fast.

I asked him over and over what about the bot is not working and the only thing he can come up with is it is slow. I said well thats your proxy has nothing to do with the bot.

You do understand that they have no idea what their talking about right? One guy thinks i should

completely customize the software to fit his needs.

And the other guy think loading slow public proxies should make the bot run fast.....

In no way shape or form do thay have anything real to say. The software works as it should. Don't let them change your mind.

Chucky. - *February 22, 2015, 4:43 pm*

First of all, I DID load in FAST PRIVATE PROXIES. Yet, you find the need too disregard the fact I did actually use private proxies. You're just a dumbass. And if you think a mod removed his thread you're completely wrong. And, if you want me too open a community alert, I will. Your bots suck, you even tried to say my Twitch bot didn't work when I could show you over 2,000 customers from that bot and 700+ vouches. You know nothing about coding, if anyone purchases this I guarantee you will not be satisfied.

Funny because the software does NOT support private proxies (Yet) ?

A private proxy would be in the format of IP:PORT:USERNAME:PASSWORD

If you entered that it would cause the program to not work.....

So no kid you used crap public proxies found on google. Do what ever you need to do as YOU stated on skype your just a reseller of your service and needed this software so you can cut out the middle man.... I'm sorry you don't understand that the only issue is your proxy speed. Besides that the software it self works as it should. Please stop flaming on my sales thread as i have already reported.

Also whats really funny is you wanted a vouch copy for my "Twitter Ultimate" (the $11.25 version). But i had a bad feeling about you because my software can totally ruin your business. Well in the aspect as anyone with the software can offer your services. So you decide "hey if i bash this guy it will keep up my sales basically.... That's cool man but i never did anything to you and i'm just trying to make a living. I do not claim i'm the best coder or even software provider. What i do is look for what the HF community wants/needs and try my best to provide them with it at a real good price. Not like some members who charge $500 for a piece of software and in 2 month quit supporting it even with bugs/glitches..... I have been a HF member for a long time i donated to the site because i like it. I have never sold anything only been a buyer for years. I just recently decided to start selling on here. I do not need to sell my products on here if it means i'm going to get this type of response. I offered to help you in anyway i can. I will provide full lifetime updates if the software quits working. Even after you started being rude. And will still provide lifetime updates even after your flaming and neg feedback. I'm really sorry your not happy with your purchase but the only issue your having is your proxies.

I brought the twitter account creator and the hotmail account creator. Both sucked, I used private proxies with the hotmail creator, I was told too use private proxies with the hotmail creator which never worked. I was then told because the twitter account creator is too slow is because I'm using shitty public proxies. And then I was told too use private proxies...Which is impossible if it doesn't support private proxies? So, I was told too use private proxies and then was told I'd love the bot if I did. How the hell can I if it doesn't support private proxies? This kid said, the reason it doesn't work is because I'm using public proxies when it's the ONLY OPTION. So, you just contradicted yourself and admitted this bot doesn't work.

(Feb 22, 2015 05:49 PM)Highasakite Wrote: [CITE] I have been a HF member for a long time i donated to the site because i like it
I've been a member since 2009 and donated a lot. This isn't about who's donated more nor is it about HF. It's about your software being a pile of shit.

(Feb 22, 2015 05:49 PM)Highasakite Wrote: [CITE] But i had a bad feeling about you because my software can totally ruin your business.
You really have no idea do you? Dude, if someone actually managed to get this bot working which I highly doubt, it won't be able too make more than 40 accounts per hour. FACT! It would take years too gather 150K+ accounts which other $40 - $50 bots can do in 2-3 days. Your bot sucks, and I guarantee your next customer will agree. Any way, I'm done with this thread I wasted $5 on this and $10 on the hotmail account creator. Not gonna moan about the money it was my own risk. Just trying too give a heads up for your future customers.

BotMarket - *February 23, 2015, 10:26 am*

Good luck!

BotMarket - *February 23, 2015, 10:59 am*

Yes kid and i was just pointing out that clearly your proxies sucked and your just flaming to protect your shitty reseller fake twitter follower business

rudeman - *February 23, 2015, 11:02 am*

I tried it with good proxies and it didn't even create the account, here's whats wrong with the program:

- Doesn't automatically fill in the Full Name, you can't create an acc without full name inputted.
- Can't get through captchas

End ur life lol

BotMarket - *February 23, 2015, 11:06 am*

It does fill in the full name. Also make sure your using the most up to date version.

If you have a service like death by captcha it will auto solve the captcha. Or it will do manual mode.

Please stop flaming on my sales thread when you have no idea what you are talking about.

So socialstamp i guess changed his mind and removed his last post but it basically said that he tells all his customers that his followers that he sells are LQ egg accounts.

But anyways how about you go back to your crap business and leave mine alone.

I removed it because it wasn't needed. If customers buy LQ they know they're getting low quality. If they buy HQ they know they're getting high quality. Shitty business? Don't you mean businesses? You're just jealous I make money and you don't. But hey, I'm done here now I only wanted too too warn members. Pretty sure you're begging for another community alert though.

You made a twitter bot and claim that private proxies require an IP:PORT in them to be private. I use 500 private proxies every single day, none of them require that.

Do you think your bots the best bot on HF or something? It's a pile of horse shit. Let me guess, you're right and all users on your thread right now are wrong? Stop selling this bot, you admitted yourself on Skype you're a new coder. I tried two of your bots, both sucked. Simple fact, here is my vouch; Buy from this guy and you'll get a none working bot and no way of a refund.

I have no idea who socialmediasuppliers is, I was going too buy his Twitter bot (after you scammed me) but decided not too. Other than that, never contacted him. Like it even matters, off topic much? Sell a bot that works.

This just shows how dumb your little group is.....

"I have no idea who socialmediasuppliers is"

Next sentence

" I was going too buy his Twitter bot "

Anyone else see the dumbness in that LMFAO

UPDATE:

Do you realize how bad that makes you look with your responses.
It does not use private proxies. It clearly says public proxies. Also Yes the proxy list must be in the format of IP:PORT

Vouch for this product, don't hesitate to buy. I bought this yesterday and it's working fine I've had no problems with the program it's self although I needed a little help as I am quite a noob when it comes to this kind of "Stuff!".

As you can see from my vouches the product works as it should. The scam report is false as the customer refused to take any of my support. Would not even screen share me so i could see if there was an issue.

Thehackerguy1 - *March 2, 2015, 1:45 pm*
You are being fake now OP, if you were not guilty for your actions you would not set me as ignored.

BotMarket - *March 2, 2015, 1:46 pm*
Please look at "Thehackerguy1's" Rep he is a LQ member why would anyone not add him to the ignore list.

Thehackerguy1 - *March 2, 2015, 1:50 pm*
LQ?, does it matter to you if i am LQ?, BTW my posts and rep maybe LQ, but at least it does not have a comment saying "Thehackerguy1" is a scammer?. Am i right?.

Don't worry, he ignored me as well ?

What I can see now is his reputation page

I was not begging i was willing to pay the price for it okay.

OP, you mean to tell me that if i go to a shop and ask for some sugar and i pay for it, does the shopkeeper go and tell other workers and say "Hey look Harish is begging me for sugar LQ."?. BTW My real name is Harish.

BotMarket - *March 2, 2015, 2:45 pm*

As you can see he wanted to buy one of my bots. I told him no so now he is flaming on my sales thread.

?????? ???? - *March 11, 2015, 6:36 am*

Wow, you must think you're a big man, sending those addmecontacts to add my Skype, wow.

I ain't the one whos been trying to "hack" your gmail account, plain and simple is if I wanted to, I'd done it already.

Does that make you a man? Thinking 200 shitty requests on Skype will actually do anything? Or are you upset you can't resolve me to "dd0s" me? Either way, amusing what you skids go though to try to prove you're "the shit."

BotMarket - *March 11, 2015, 4:06 pm*

I have no idea what your talking about, sounds like you need to stop flaming on everyone's sales threads, buying products on HF then within 1 min demanding a refund..... Also refusing support. Your just a little kid trying to get free products by making threats of fake scam reports if people don't refund you.
