Thread: [FREE] FTP Spreader v1.0 [HOT]

¶_¶ - *June 11, 2010, 6:50 pm*

What is it?
With this you can make redirection to your infected file using your stolen FTP. You can spread a lot with this! =D

How to use it?
1) Download and extract the archive.
2) Make a new .TXT with your stolen FTP like this :
=> ftp://username:password@ftp.yourstolenftp1.com
=> ftp://username:password@ftp.yourstolenftp2.com
=> ftp://username:password@ftp.yourstolenftp3.com
=> ...
3) Edit index.html & index.php with the link to your infected file.
3) Open FTP Spreader v1.0.exe.
4) Browse to FTP List.
5) Click on "Start Spreading" & enjoy! ?

Nice job!

I don't think I have ever seen an FTP Spreader before.

I am definitely going to check this out.

Will give feedback :D

I got a bot on my BlackShades server from this already.

I was right :D It was a nice share.

Good work, hope to see future releases! :)

Any more feedback on this?

hacphongthan - *June 12, 2010, 1:46 am*
how it work?
auto infect to html or what method ?

Joseph Ducreux - *June 12, 2010, 1:47 am*
does it have download features aswell? worm like downloader capabilities?

A FTP List is a list of stolen FTP with adress, user & pass.
You can use a stealer or a keylogger to get some.

It's only using redirection. But maybe in a future version it will use html/php infection or java/activeX...

It's not a worm. You can edit index.html & index.php with the link to your own worm...

Although I won't have much use for this, I just wish to say that It's a nice little tool Indeed.
Great contribution mate.
