No problem. I'm not a good coder but it's working. ^^

i dunno. looks kinda useless to me, cuz you'll need a list. but not bad for a learner.

¶_¶ - *June 12, 2010, 3:24 am*
Why you think it's useless?

cuz you need a list. it's just uploading files. it's not like a server uploading it self. get it?

I got an idea from this:
How about stealing filezilla passwords with a spreader,
then upload to the ftp using the passwords ? ?

¶_¶ - *June 12, 2010, 4:27 am*
Yes that's a good idea man! =D

now that's a good one, maybe all ftp clients, not just filezilla. but stealing would be better than using for spreading ... so...
