Thread: CPU So Fucking High Can Someone Help Thx

Root - *March 31, 2015, 8:42 pm*

I scanned my PC Cleaned Everything, Also Run CCleaner still on High CPU ?

SIM-2096295 - *March 31, 2015, 8:43 pm*
Do you have utorrent installed? ------

Root - *March 31, 2015, 8:54 pm*
No, I don't my pc was fine an hour ago...

And I haven't installed anything? (Mar 31, 2015 08:43 PM)Stuperb Wrote: *[CITE]* Do you have utorrent installed? ------

Check you msconfig, look for anything weird, then restart pc.

Root - *March 31, 2015, 9:09 pm*
No help same shit there is something running on my pc like miner? (Mar 31, 2015 09:04 PM)One Virus(° ? °) Wrote: *[CITE]* Check you msconfig, look for anything weird, then restart pc.

archangel.dmitry - *March 31, 2015, 9:10 pm*
Download and run Process Explorer from System Internals suit. You might be able to see the process hogging the CPU.

Root - *April 1, 2015, 12:55 pm*
Nothing right now my CPU is 11%

but sometimes it goes up.

archangel.dmitry - *April 1, 2015, 1:35 pm*
When it goes up, make sure to have Process Explorer open. If there is a rootkit, you will not see it most likely.

5chn4pp - *April 1, 2015, 1:38 pm*
Run TdssKiller and make sure to check the loaded modules option. After that, remove any Malware it finds.

Scanned nothing found it can be Crypted hmm?

5chn4pp - *April 1, 2015, 2:02 pm*
try to scan with Nobot and take a picture and post it here what it finds.

Zesto - *April 1, 2015, 4:27 pm*
It could be a virus that activates later after the install I have had a few of those before. I would suggest going into windows safe mode then run a few scans and look for it there... If you havent already

Oliver Sykes - *April 1, 2015, 4:28 pm*
Are you multitasking? Doing intense things, especially on a laptop, can do this without malware.

Root - *April 1, 2015, 4:57 pm*
I scanned with everything you guys said Nothing Found.

I'm not multitasking idk whats the problem. Right Now there is nothing my CPU is normal.

But some times it gets really bad...

5chn4pp - *April 1, 2015, 5:00 pm*
make sure your pc is not over heating, try checking your fans and such.

Root - *April 1, 2015, 5:01 pm*
hmm all good it doesn't over heat ? (Apr 1, 2015 05:00 PM)One Virus(° ? °) Wrote: *[CITE]* make sure your pc is not over heating, try checking your fans and such.

GiveMeSpeedTurtle - *April 1, 2015, 5:07 pm*
I can give you a checkup via TV if you want too.

Herbert - *April 2, 2015, 5:59 am*
had the same problem with my laptop, might have to do with the extensions you have for your browser.

Roger Waters - *April 2, 2015, 7:24 am*
Mind screenshotting what processes are running on the "Processes" tab? This would assist us in knowing what is currently running on your PC and would allow us to see what's causing the issue.

Root - *April 2, 2015, 2:14 pm*

Sure mate here you go?

Grin - *April 2, 2015, 2:15 pm*
wow. Indeed. It is high as fuck. Maybe stop hotboxing your room.

5chn4pp - *April 2, 2015, 2:17 pm*
why all the *windows problem reporting*???

Root - *April 2, 2015, 2:40 pm*
The funny thing is if I press log off so it will close all programs but last second stop it CPU Goes down at once it becomes like 5% tops.

-Hyperion - *April 2, 2015, 3:34 pm*

want me to teamview you real quick and see what I find

Root - *April 2, 2015, 3:35 pm*

sure thing mate add me on skype for TV info please : Omin (Apr 2, 2015 03:34 PM)-Hyperion Wrote: *[CITE]* want me to teamview you real quick and see what I find

Looking in task manager for malware is like looking for a black sheep with a white coat on.
